VOLUME V

FOREWORD

IF this book shall serve in some small measure to develop a stronger College spirit; to bind all departments into a closer union; to form a true record of the year's achievements, and to justify our greatest efforts in pursuit of our Ideal George Washington, we, the Board of Editors, will feel that our work has fully repaid us.

To

HOWARD LINCOLN HODGKINS

This Volume is Dedicated in Appreciation of
His Many Years of Earnest Effort in
Behalf of the University

HOWARD LINCOLN HODGKINS

DEAN OF THE COLLEGE OF ENGINEERING AND MECHANIC ARTS

DOCTOR HOWARD LINCOLN HODGKINS, Dean of the College of Engineering and Mechanic Arts of the George Washington University was born in Elgin, Illinois, and received his earlier education in Chicago. He later moved to Washington and graduated in 1878 with the first class of the Washington high school. He entered the Columbian Prep the following year and a year later Columbian College. He was graduated from Columbian College with the degrees of A. B. and A. M. in 1883.

From the time of his entering the Prep in 1876 he has been continuously connected with the George Washington University, being the senior member of the Faculty of Arts and Sciences. He started his teaching in the Prep School in his senior year and one year after graduation he was formally appointed Assistant Professor in the Corcoran Scientific School, which was then started. He became a full Professor of Mathematics three years later in 1887. He was the author of the "Historical Catalogue of the Columbian University," issued in 1891, and in 1892 received the degree of Doctor of Philosophy.

Dr. Hodgkins was appointed Dean of the Corcoran Scientific School in 1897 and held that position until 1903. In that year he became Head Professor of Physics and has since done teaching in both the Physics and Mathematics Department.

From 1901 to 1903 there was no President of the University, one of the trustees being acting president. Dr. Hodgkins was Dean of the University, exercising most of the duties of the president.

Since the reorganization under the new name of George Washington University, Dr. Hodgkins has been Dean of the Engineering College.

Dean Hodgkins has been Secretary of the Alumni Association since its organization and has been very active in its affairs at all times. He is a member of a number of the learned societies and of the Cosmos Club of Washington.

Altogether, through an association with the University of nearly thirty-four years, as student, alumnus, professor and dean, there is no one more closely associated with the past, present and with the future aims of the University.

University Calendar

1911.

JUNE 7, *Wednesday*—University Commencement.

SUMMER VACATION.

SEPTEMBER 27, *Wednesday*—Academic Year begins in all Departments of the University.

OCTOBER 11, *Wednesday*—Stated meeting of Board of Trustees.

OCTOBER 20, *Friday*.—Last day for registration for the first term without late-registration fee.

NOVEMBER 23-25, *Thursday to Saturday*, both inclusive—Thanksgiving recess.

RECESS FROM DECEMBER 23, 1911, TO JANUARY 2, 1912, BOTH INCLUSIVE.

1912.

JANUARY 29, *Monday*.—Last day on which dissertations may be presented.

JANUARY 10, *Wednesday*.—Stated meeting of the Board of Trustees.

FEBRUARY 1, *Thursday*.—Second term begins.

FEBRUARY 12, *Monday*.—Doctorate Disputation.

FEBRUARY 20, *Tuesday*.—Last day for registration for the second term without late-registration fee.

APRIL 5-8, *Friday to Monday*, both inclusive.—Easter holidays.

APRIL 9, —*Tuesday*.—Davis Prize Speaking.

MAY 1, *Wednesday*.—Last day on which dissertations may be presented.

MAY 20, *Monday*.—Doctorate Disputation.

MAY 21-24, *Tuesday to Friday*.—Examinations for admission.

MAY 29, *Wednesday*.—Annual meeting of the Board of Trustees.

MAY 30, *Thursday*.—A holiday in all departments of the University.

JUNE 2, *Sunday*.—Baccalaureate Sermon.

JUNE 5, *Wednesday*.—University Commencement.

The University

*

IT IS a fit subject for regret that the historic past of the George Washington University is so little known and appreciated. An urban university rarely has the conditions favorable to the growth of academic traditions. These generally cluster around some particular building or spot on the campus, and are commemorated by observances for which the privacy of the campus gives free opportunity for development. The college located in the city, and especially in the heart of the city, must be prepared to surrender much of its custom and tradition, from the very necessities of its situation. The freedom of a campus in the business section of a city is out of the question. The concrete expressions of college spirit and undergraduate animation are apt to fall afoul of the Metropolitan Police. So George Washington has from its situation lost much of its student life, and much of the tradition and custom that serves to commemorate the history of an institution.

The idea of a national university at the National Capital dates from the beginning of our country's history. George Washington in his will set aside a large sum of money for the founding of such an institution, and pictured his dream of the new city on the Potomac as a center of a broad, national culture. Thomas Jefferson, who drew up the first plan for the educational system of the District of Columbia, outlined three branches or stages of public education: the primary schools, the academy, and a university. Congress doubted its authority under the Constitution to establish such a university, and took no action at the time. To this day the bequest has not been fulfilled.

The beginnings of the present George Washington University can be traced back to the year 1819, when Luther Rice, a Baptist minister, impressed by the splendid opportunities afforded to a college in the National Capital, set about energetically soliciting subscriptions from all classes of people all over the United States for the foundation of a college. By the aid of President Monroe a charter was secured from Congress in 1821 for the establishment of "The Columbian College in the District of Columbia," for the "sole and exclusive purpose of educating youth in the English, learned, and foreign languages, the liberal arts, sciences, and literature," and with power to confer all degrees usually conferred by institutions of collegiate rank. The broad principles on which our University was founded are sufficiently indicated by a provision in our original charter to the effect that "persons of all religious denominations shall be capable of being elected trustees, nor shall any person, either as president, professor, tutor, or pupil, be refused admittance into said college or denied any of the privileges, immunities, or advantages thereof, for or on account of his sentiments in matters of religion."

A tract of land on what is now known as Columbia Heights was purchased with the money raised by Luther Rice through subscriptions, and a college building was completed in 1822. Among the noted Americans and Britons who contributed to the fund were John Quincy Adams, William F. Crawford, John C. Calhoun, the Chancellor of the Exchequer, the Bishop of Durham, Lord Ashburton, Sir James Mackintosh, as well as a number of members of Congress and other distinguished people.

The formal opening of the College took place on January 9, 1822, with the Rev. William Staughton as president, and thirty-nine students in attendance. Only the theological and classical departments were opened at this time. Within the next five years, however, the law, medical, philosophical, and preparatory departments were opened in

rapid succession. The first commencement took place on December 15, 1824, when three men were graduated, before President Monroe, General Lafayette, the Secretaries of State, War, and Navy, and leading members of both houses of Congress.

The College showed a steady increase in the number of its students, and as early as 1824 had on its rolls 150 students, representing twenty-one out of the twenty-four States. This number has increased within the past few years to a maximum in the neighborhood of 1,500 students, representing every State and Territory in the Union, as well as a dozen or more foreign countries.

Columbian College owed its life and prosperity to the continued and remitting efforts of Luther Rice, who before his death in 1836 secured for it nearly one hundred and fifty thousand dollars by subscriptions from practically every State in the Union. Later, John Withers, of Virginia, contributing from time to time, gave a total of nearly seventy thousand dollars. Congress, during the first administration of President Jackson, appropriated lots worth twenty-five thousand dollars to Columbian and a like amount to Georgetown. This was the only money that the institution has ever received from the Government.

As was the case in so many institutions, particularly in the South, the Civil War practically suspended classes in Columbian College. A large proportion of the students, Southern Baptists, went to fight in the armies of the Confederacy, and many fought in the armies of the Union. The College buildings were used by the Government for hospital purposes. When the war was over a few students drifted back to take up their studies, and Columbian College resumed its task of educating the youth of the District.

In this period of its fortunes Columbian College owed a deep debt of gratitude to the benefactions of Mr. W. W. Corcoran, who contributed liberally to the work of the institution. By act of Congress the name of the College was changed in 1873 to the Columbian University, and the Board of Trustees was made self-perpetuating. Beginning with 1879 the transformation of the institution from a suburban college to a city university began. The Trustees came to the conclusion that Columbian must be removed to the center of the city in order to hold the students, and the piecemeal sale of the College Hill property was commenced. Mr. Corcoran offered the University the lot on which the present Arlington Hotel is situated, but as the land in question was considered too small, Mr. Corcoran was induced to permit the sale of his gift and the reinvestment in cheaper lands. The Harris property, at Fifteenth and H streets, previously the site of a clubhouse, was purchased, and a building, considered at the time one of the most up-to-date college buildings, was begun in 1883. During the following school year the removal to the heart of the city was effected. In the Fifteenth street building were located the classical and law departments, and the newly-founded Corcoran Scientific School. The old Law Building was erected in 1898, and occupied by the departments of law and diplomacy.

In 1898 the Baptist denomination assumed control of the University by an act of Congress which provided that two-thirds of the Board of Trustees should be members of that denomination. The non-sectarian character of the institution was restored, however, by an act of Congress in 1904.

By act of Congress and with the approval of the Secretary of the Interior and the United States Commissioner of Education the name of the institution was changed to The George Washington University. This name was assumed on the promise of an endowment of half a million, a promise which has never as yet been realized, and to symbolize the new aspirations of the University to a national scope of education. A period of rapid expansion of the University followed.

The new enterprises of the University did not obtain the financial backing that was

expected. The endowment fell below the requirements of the Carnegie Foundation, and the institution was barred from the benefits of the pension fund of the Foundation.

The temporary failure of the University's petition for the benefits of the Morrill Fund helped to increase our financial difficulties. The Morrill Act provides for the distribution of revenue from public lands among the States to institutions offering courses in agriculture and the mechanic arts. The District of Columbia has never had its share of the benefits of this fund, and George Washington, as the only non-sectarian university in the District, made its petition for the endowment. In spite of bitter opposition, both open and secret, from interested parties, the bill granting George Washington the benefits of the Morrill Act was favorably reported by the committees of both Houses, but in the absorbing political developments of that year the measure was lost sight of.

It became evident that the property at Fifteenth and H streets was too valuable a piece of land to be utilized economically for college purposes, and it was sold to S. W. Woodward for \$450,000. The Colleges of Arts and Sciences, Engineering and Mechanic Arts, and the Teachers College were removed to a row of six buildings on I street between Fifteenth and Sixteenth streets, occupied by the University, and the Division of Architecture was dropped.

The money from the sale of the University property was applied to the indebtedness of the institution with such results that the University was soon freed from debt and steps were taken to restore the endowment to its former figure. Under the wise and economical management of President Charles Herbert Stockton, Rear Admiral U. S. N., retired, the expenses of the University have been reduced to a minimum, and it is due to his efforts that the University is now on its feet. The University is now free from debt, and its income for the next five years has been fully assured.

Formal notice was served on the first of February, this year, by the Arlington Hotel Company that the I street building would be torn down to make room for a larger hotel, and must be vacated by May 1. Shortly after it was announced that the University had leased the former home of the St. Rose Industrial School at 2023 G street N. W. Preparations were made to move the Department of Arts and Sciences and the University offices during the academic term, and by granting a week of extra holiday at Easter the removal was effected so smoothly that classwork was resumed without interruption on April 15. The building has been thoroughly remodeled and renovated for college purposes, and has proved remarkably well suited to our needs.

Since 1902 the former College, the Corcoran Scientific School, and the School of Graduate Studies have been merged into the Department of Arts and Sciences. Under this department are now conducted the College of Arts and Sciences, the College of Engineering and Mechanical Arts, the College of Political Sciences, and the Teachers College, under the Faculty of Undergraduate Studies; and under the Faculty of Graduate Studies, graduate seminary, laboratory and lecture courses leading to the master's degrees, the engineering degrees, and the degrees of doctor of jurisprudence and doctor of philosophy. The other departments comprising the University are the Department of Law, the Department of Medicine, the Department of Dentistry, and the two associated colleges, the National College of Pharmacy and the College of Veterinary Medicine.

The total registration this year has exceeded thirteen hundred, and the faculty numbers approximately two hundred. All departments of the University are well equipped to give thorough training, and the opportunities for original research cannot be surpassed. In addition to the well-stocked University Library, the student has at his command the Library of Congress, comprising more than two million volumes, and Congress has by special enactment made the various scientific libraries and collections of the Government open to him for special research.

ARTS AND SCIENCES.

FACULTY

The Faculty of Graduate Studies

CHARLES H. STOCKTON, LL. D.	PRESIDENT OF THE UNIVERSITY
HOWARD LINCOLN HODGKINS, Ph. D.	Professor of Mathematics
HERMANN SCHOENFELD, Ph. D.	Professor of German
CHARLES E. MUNROE, Ph.D.	Professor of Chemistry, and Dean
CHARLES CLINTON SWISHER, Ph.D., LL. D.	Professor of History
WILLIAM ALLEN WILBUR, A. M.	Professor of English
GEORGE N. HENNING, A. M.	Professor of Romance Languages
THEODORE N. GILL, Ph.D.	Professor of Zoology, Emeritus
FRANK W. CLARKE, Sc.D.	Professor of Mineral Chemistry
HARVEY W. WILEY, Ph.D.	Professor of Agricultural Chemistry
GEORGE P. MERRILL, Ph.D.	Professor of Geology and Mineralogy
PAUL BARTSCH, M. S., Ph.D.	Professor of Zoology
WILLISTON S. HOUGH, Ph. M.	Professor of Philosophy
GEORGE M. STERNBERG, M. D., LL. D., Surgeon-General U. S. A.	Professor of Preventive Medicine
ASAPH HALL, JR., Ph.D.	Professor of Astronomy
SHEPHERD IVORY FRANZ, Ph.D.	Professor of Experimental Psychology
HENRY PARKER WILLIS, Ph.D.	Professor of Finance
ALBERT MANN, A. M., Ph.D.	Professor of Botany
ERNEST G. LORENZEN, Ph. B., J. U. D.	Professor of Law
CHARLES SIDNEY SMITH, Ph.D.	Professor of Greek and Latin
N. MONROE HOPKINS, Ph.D.	Assistant Professor of Chemistry
EDWIN A. HILL, Ph.D.	Assistant Professor of Stero-Chemistry
PHILANDER BETTS, M. S., E. E.	Assistant Professor of Electrical Engineering
ALFRED F. W. SCHMIDT, A. M.	Assistant Professor of German
EDWIN DUNSTAN, C. E.	Assistant Professor of Civil Engineering
OSCAR A. MECHLIN, C. E.	Assistant Professor of Civil Engineering
WILLIAM C. RUEDIGER, Ph.D.	Assistant Professor of Educational Psychology
PERLEY G. NUTTING, Ph.D.	Assistant Professor of Physics
FREDERICK E. FOWLE, JR., S. B.	Lecturer on Astro-Physics

HAYNER H. GORDON, E. E.	Instructor in Mechanical Engineering
ROBERT W. MORSE, S. B.	Instructor in Mechanical Engineering
MARK R. WOODWARD, E. E.	Instructor in Electrical Engineering
LESLIE CLEVELAND MCNEMAR, A. B.	Instructor in Political Science and International Law
DE WITT CLINTON POOLE	Instructor in Political Science
WILLIAM HAMILTON, Ph.D.	Lecturer on History
WILLARD S. SMITH, Ph.D.	Lecturer on Education
STEPHEN E. KRAMER, B. S., A. M.	Lecturer on Education
JOHN B. OSBORNE, M. A.	Lecturer on Consular Service
PAUL CHARLTON	Lecturer on Colonial Administration
JOHN M. COULTER, M. A.	Lecturer on Economics

EVERY year it becomes more difficult to write the history of the Senior Class, for all the pleasant things which might be said have already been said about previous years. We do not boast that we are the best class that has ever gone out from the old school. We only ask that you judge of our merit not by what we have done when the curtain falls behind us in 1912, but by what Old Father Time will indite about us in his record in 1950. Our college years have been but years of preparation for the future that is to come. You will behold the fruition of our labors, when some of us, not excluding the fair coeds, shall be members of the international arbitration board, compute the income tax and the minimum wage scale and operate the trans-Atlantic air steamers.

As for a few details of our history, we started in bouyant and conceited as most Freshmen. On the night of our first class meeting, however, the upper classmen saw that we were reduced to the proper state of humility. Together, we toiled through the difficulties of Horace and Levy and were initiated into the perplexities of college mathematics. We took a peep into the mysteries of the Middle Ages and began to learn to appreciate the beauties of literature. We were also taught the art of expressing our newly-awakened souls through the medium of language.

Our Sophomore and Junior years were very uneventful. During this period many of our number fell by the wayside, and the rest of us took such entirely different courses that we lost that close feeling of kinship.

At last our Senior year has come, though its two most important events, the graduation exercises and the class banquet, are still to be. We know that both of these will be brilliant affairs. At our banquet we hope to renew old ties and form many new ones, so that we can depart with courage high and spirits joyful as the Class of 1912.

Senior College

HANS WILHELM FERD. ANDERSON . . . Germany

Chancellor of the German Embassy

Mr. Anderson came to America to show the German Ambassador how to hold down his job and to pray for mercy for the Kaiser at the hands of Uncle Sam. In his spare moments he has attended G. W. U. and given scholarly topics in Shakespeare class.

ROGER S. G. BOUTELL

Mr. Boutell, after wandering all over the globe, came back to Washington and decided to lead a quiet, domestic life. His Harvard career has taught him to take things as they come, so he is now trying to earn a living baffling the juries and judges of Washington.

MINNIE HULDA BRACKHAGEN . . Dist. of Columbia

Yes, Minna is Dutch. And that is one of the reasons why she is such a shining light in German class. Minna hopes to teach her mother-tongue in some high school.

EDITH CATHERINE CASH . . . District of Columbia

Second University Scholarship

"Her voice was ever soft and low;
An excellent thing in woman."

We can say a rare thing about Edith. She is one of our brightest and most conscientious students, and, withal, a modest woman.

MABEL LOUISE CHAPIN, Σ K . . District of Columbia

Behold the Zoologist and Vivisectionist!

Mabel spends most of her time in cutting up bugs, oysters and star fishes; but, in spite of all this, she is a splendid girl.

Senior College

RALPH McNEAL DUNBAR.....Maryland

Second University Scholarship, Junior Class Poem

A truly great man, but don't ask him about it—there are too few unspoiled men. Dunbar is endowed with a knowledge of books that is an index to his capacity. Carnegie did not endow the above library.

WALTER S. EATHERLY

L. I. 1904, University of Nashville

Mr. Eatherly is a born mathematician. He learned to count on his toes before he learned to talk, and the first combination he ever made with his letter blocks was Q. E. D. Later, however, he found girls of powder and curls to be more bewitching than the Witch of Agnesi.

JOHN PATEN FLEMING, A B Φ. .Dist. of Columbia

'Varsity Track Team '08-'09; Captain '10-'11-'12

Y. M. C. A. Brotherhood of St. Andrew

Treasurer Senior Class

Pyramid Honor Society

Here is a man who turned out and ran, but in the right direction. Long distances never faze him; no matter what the race is for, he sticks and wins. The long-distance record for talking he never attempts.

RALPH WYLIE FREY.....District of Columbia

We could elicit no information from Mr. Frey concerning himself except that fact that he is a member of the G. W. U. Chemical Society.

JEANETTE GESCHICKTER, Σ K. .Dist. of Columbia

Class Secretary 1908-1909

Class Editor THE CHERRY TREE (1912)

No one offered to write the editor's biography, and it is not seemly that she should enumerate her own virtues.

Senior College

W. E. HANCOCK.....Texas

Our friend from Central America is a great man, all right. He generally knows what he is talking about or he keeps silent. You are beaten from the beginning if you get into a Seventh Day Adventist argument with him. We must not forget to add that Hancock preaches in Takoma Park.

GEORGE T. HARRINGTON.....Vermont

Mr. Harrington has a B. S. in Agriculture from the University of Vermont, but seemed to think his education would not be complete without a B. S. in Chemistry from G. W. U. Besides being a chemist, Mr. Harrington is a rank prohibitionist.

ENID MARION HOBBS.....Canada

President of the Y. W. C. A., 1911-1912

Miss Hobbs is a splendid representative of our English cousins, for she is one of the finest students of whom our class can boast.

MAUD LILLIAN JACKSON....District of Columbia

Miss Jackson's specialties are History and English, although she has other interests, judging from the fraternity pin she wears.

ELEANOR ISABELLE JONES, II B Φ.....Ohio

Class Secretary, 1910-1911

Nelle is one of the few girls whom it is an inspiration to have worked with during four years of college. She is continually striving to make the world happier. The seat of her affections is divided rather unevenly 'twixt Annapolis, Washington, and Columbus, Ohio. Columbus is farther away, but distance, you know, lends enchantment.

Senior College

HAROLD KEATS, Θ Δ X. Pennsylvania

"Babe;" First University Scholarship; Freshman Football Team; Class President 1909-1910; Junior Class Hatchet Oration; Track Team '09-'10-'11-'12; Manager Indoor Meet 1911; Enosinian Society; Senior Class Orator; Associate Editor of *The Hatchet* '10-'11-'12; Pyramid Honor Society
Little room and less need to say more.

JOSEPH MCCORMICK. Pennsylvania

Mr. McCormick began his college career at Georgetown, but at the end of the junior year thought better of it and came to G. W. U. He has made an unusually fine record for himself since his arrival, and it is a great pity he did not come here before.

MINOR EVERETT MCCRISTIE. Ohio

Mr. McCristie is one of the bluebloods of the old Buckeye State, and a lady's man at that. He has received much attention from the fair co-eds since his arrival in the National Capital, and others have journeyed from his native State to pay him homage.

JAMES LEWIS MONEYWAY. Florida

Member of Chemical Society
Member of Calcium Club
Class Editor of Department of A. and S., '10-'11-'12;
Upper Dance Committees

Mr. Moneyway's specialty is telling coon stories. When he first came here he even read Shakespeare in negro dialect; this, however, was done unconsciously. Wouldn't he be a nice boy if he wasn't married?

KATHERINE MITCHELL NEWBOLD. . Dist. of Col.

Katherine is one of the few people who can find any humor in the old Latin and Greek philosophers.

Senior College

PAUL M. ROUNDY.....New York

Paul is well named, for he is as strenuous as his ancestors. He came to George Washington from Syracuse, where he had been trained in five o'clock teas and Saturday night dances. His favorite amusements are church socials and the pick and hammer.

ANDREW BRYANT REAVIS, Σ Φ Ε.....Tennessee

Mr. Reavis finds the life of a student a congenial one, for before coming here he took the degree of L. L. B. from the National University Law School.

KATHERINE STRONG SUMMY, X Ω...Dist. of Col.

Class Secretary 1911-1912

Katherine is one of the most energetic of our number, for in addition to doing all her college work well, she also teaches art in the graded schools.

ANNA LORETTE ROSE, X Ω...District of Columbia

Anna began her college career before the year 1908, but so much did she think of the class of 1912 that she taught a year or two in between in order to graduate with us.

DOROTHY SMALLWOOD, Π Β Φ...Dist. of Columbia

She has studied Greek and Latin,
French and German, Spanish, Swede.
In auto-car machinery she's very wise indeed;
She's had midshipmen to court her—
She's had frat pins by the score,
But she's going away from college—
To be gone forever more.

So adieu to all our fancies,
And adieu to all our joys.
What will become of G. W. U.
And all that awful noise?
Not a laugh in any hallway—
Not a murmur, or a joke,
For our Dotley's going to leave us,
And our hearts are badly broke.

Senior College

ELMER STEWART, $\Phi \Sigma \chi$. . . District of Columbia

G. W. U. Chemical Society
Class Treasurer 1909-1910

Mr. Stewart's activities are limited to chemical and allied interests. He is known as the "parliamentarian" of the Chemical Society, but why we have not been able to discover.

GEORGE PELHAM WALTON. . District of Columbia

Mr. Walton is a chemist, but he often neglects his scientific researches for sentimental reasons.

IT IS with mixed feelings of pleasure and regret that we look forward to a certain day in June, 1912, when we, the Seniors of the Engineering College of George Washington University, hope to receive those precious pieces of sheep skin, our diplomas. It is with pleasure that we look back on some hard work well done, on many good times at old G. W. U. and on the friendships made there, which we hope will last through many years to come. We remember with regret that our college days are almost over and that the time will soon be here to bid good bye to our fellow students and to the professors and above all to our real friend and helper, The Dean. Our record is far from perfect, but considering the many temptations of "five-hundred," tennis and shuffle-board, it really might have been worse.

It is unfortunate that we should have to leave at this time, just when the University is entering upon a new era, but we take pleasure in turning over the benefits to our worthy successors, the class of "1913."

"Here's to G. W. U., fellows, and the class of 1912!"

Senior Engineering

HOWARD PAUL BAYLY . . . B. S. in C. E., $\Sigma \Phi E$

Vice President of Class

From the Pine Tree State, and a noted runner. Has twice defended $\Sigma \Phi E$ and G. W. U. three times on the track. The only man who ever had the products of combustion from his cigars analyzed in an Orsat's gas apparatus.

HUGH GATES BOUTELL B. S. in M. E. "Union"

President of the Class
Engineering Editor of *The Hatchet*

A resident of Washington, though his past is surrounded by mystery. Is fond of locomotives and "Wheebingles," being particularly partial to young ones under 15.

ROBERT HORACE HARRISON B. S. in C. E. "Union"

Senior Class Editor of THE CHERRY TREE

The District of Columbia may well be proud of Bob. He was President of the Class in 1910-'11, pulled off the most successful upper class dance ever held, and has been a "minor prof." at G. W. U. at the same time.

CURTIS EDGAR MCCALIP B. S. in E. E. "Union"

Secretary of the Class

Fire Engine Mac. Knows the make, size and age of every fire engine in the United States, and has even been known to leave his best girl on Saturday nights to answer an alarm. The department in Washington, however, can get points from the one in Crawfordsville, Ind., according to Mac.

ROBERT JOHN POTBURY B. S. in C. E. "Union."

Treasurer of the Class

One of the finest men in G. W. U. It takes an artist to keep up his work and at the same time be in for every celebration the way Pot is. Washington will see him shine like a Tungsten lamp some day.

Senior Engineering

JOSEPH ADDISON PRESTON SCOTT, JR.
 B. S. in C. E. "Union"

The only "good" man in the Class. He has kept us out of trouble many times, but takes no credit on himself. Always carries his bicycle lamp with him, ostensibly to prevent its being stolen, but we believe he's looking, like Diogenes, for an honest man.

FRANK VIEHMEYER B. S. in C. E., $\Sigma \Phi E$

Has written a remarkable treatise on the water-power development at Niagara Falls. One of our best students, and active in all college activities. One of the first-rate products of the District of Columbia.

WILLIAM CURTIS COOLEY BALL B. S. in C. E.

HOWARD PALMER SAFFORD B. S. in E. E. "Union"
 President of the Engineering Society

GEORGE POOLE B. S. in M. E., $\Sigma \Phi E$

JOHN DANIEL STUWEE B. S. in C. E.

ALBERT L. HARRIS B. S. in Arch. Eng.

HOWARD FRANCIS DOUGHERTY B. S. in C. E.

WILLIAM SHELTON GORDON DULIN B. S. in C. E., $\Sigma \Phi E$

JUNIOR ARTS AND SCIENCES

IT IS with a sigh of relief that the Lucky Class of '13 finds itself permanently settled in its fine apartments on G street. We say lucky, advisedly, for what class has seen so much of the world as ours?

Our first glimpse of the college was obtained when we, as Freshmen, entered the old brick building at Fifteenth and H streets. How well we remember the grand reception we received from the poor little Sophs, and how little they must have felt when it was over. We also recall with delight the severe punishment meted out to them by us on the football field.

Many happy days were spent by us in this old brick building, but being an ambitious class and anxious to see more of the world, we started traveling westward. As the result of our ambition we found ourselves, at the opening of the Sophomore year, in the new college buildings on I Street.

Toward the close of our Junior year we became seized with a desire to see still more of the world, so following Horace Greeley's advice we journeyed further west. This innate desire to follow untrodden paths has finally brought us to our present station. It is with great joy and delight that we find ourselves in such pleasant and encouraging surroundings.

During these past three years we have been well represented in various kinds of athletics and student activities. We point with pride to our achievements on the football field and track team. Our achievements lie not only in the field of brawn but also in the field of brain. Prompted by our thirst for knowledge and our desire to help one another, and having a number of devotees of the "black art" in our midst, we organized the Chemical Society, an organization, which, without doubt, is the most active in the University.

Over here on G street the atmosphere surrounding us is one of studious endeavor, and we are now well content "to labor and to wait" and to remain settled for one year, after which we will go forth into the world.

JUNIOR ENGINEERING CLASS

MAN may come and man may go but we go on forever." Thus spake the prophet, and he who spakes thusly knows whereof he spakes, because, although diminished at times and augmented at others, still we flourish, for are not we the chosen of Allah? Do we not work miracles, we engineers? Is it not through us that this world is what it is now? Think, think, think of what would have become of this little world of ours if it had not been for the engineers. Suppose there were no Edison, no Maxim, no Stephenson, no Fulton, or even suppose there had been no Jules Verne? How would it have been possible for the Pyramids to be built without the aid of the engineers? Think of the wonderful hanging gardens of the ancients, or, to come down to the present, think of this, the most wonderful feat of all times, the construction of the Panama Canal. Thus may it be seen how great a part has engineering taken in all the problems of the olden as well as of the modern times.

The science of engineering, however, was not in former times what it is today. It has been developing, broadening, and making itself necessary in every walk of life, until, finally, we have before us perfection personified, and it needs not me to say that this is the Engineering Class of George Washington University of 1913.

For three long years now have we slaved, studying hard, attending class regularly and doing all the other things that a good student should do (ask any of our dear beloved professors), but we have labored with an end in view, for was it not foretold that this class was to be the best one ever turned out from George Washington University? Yea. And hasn't our work during the first three years fully lived up to this prophecy? Again I answer Yea. Therefore, who can say that it shall not keep up this standard in the fourth year? Considering the material making up the aforesaid class, we must say, NOBODY.

Let there be peace, I have spoken.

SOPHOMORE COLLEGE

SOPHOMORE

WHEN school opened in the year of 1910-11, in its new quarters in I street, it was with a right royal welcome that the Class of 1914 was greeted by all, especially the members of the Class of 1913. They were so very eager to help us that it was hard to resist their proffered assistance, but we succeeded in withstanding all of their overtures until our class elections were accomplished. My, didn't we feel proud after our first elections! We were much disappointed because we were denied the pleasure of meeting—and defeating—the Class of 1913, for we had looked forward to that event with much pleasure. Maybe, before they leave the school, we may yet accomplish the long-delayed victory. Our first appearance in the social life of the college occurred at our dance on Thanksgiving evening at the Arlington Hotel, which was considered quite a success by the large number who were present. In that first year of our college life we were green, we admit, but under the subduing and enlightening influence of the members of the upper classes we have now left all traces of our first sprouts behind, and at the opening of the present year we are shooting out our first leaves and appearing in all the splendor of our added dignity.

Our first duty this year was to receive the Freshmen, and this we proceeded to do in the most approved of manner. We even sent out engraved invitations to them, telling them that we would be pleased to meet them on the evening of their first class meeting. They will testify that they had a cordial reception and that the Sophomores certainly know how to do things. This done, we now turned our attention to the election of our own officers, which took place in West Hall.

The officers elected then were: President, Mr. Alvord Gore; vice president, Miss Maie Zirkin; secretary, Miss Louise Wooster; treasurer, Mr. Earl Taggart; class editor, Miss Elizabeth Ferguson.

Though barely started on our college career, we have already made a distinct showing in all the college activities. This record we mean to uphold during the remainder of our life at old George Washington, and we know that though there have been many, many classes in the history of the school, and that there will be many, many more, there will be none more loyal in every forward movement than that of 1914.

SOPHOMORE ENGINEERING

 H, YES! We came back strong this year. There were forty of us when the time came to give the Freshmen an informal reception. And we surely did show the incoming class how college life should start in a proper manner. With the co-operation of our brother "Sophs" in the College, we transformed their smiling countenances to such a hue that they seemed "green" with envy.

We had our class election soon after the college opened and chose the following men to guide our class through the school year:

THOMAS P. MURRAY.....	<i>President</i>
S. WORCESTER MASON.....	<i>Vice-President</i>
JAMES P. NASH.....	<i>Secretary and Treasurer</i>
GEORGE A. DEGNAN.....	<i>Class Editor</i>
PRENTISS D. SALE.....	<i>Sergeant-at-Arms</i>

During the year the members of our class were conspicuous in all the happenings around the College, and all of us hope to see each other next year when the gong starts another heat in our race for degrees.

FRESHMAN CLASS

YES, they made their appearance on September, 1911, 500 strong. And so started the Class of 1915 on its record-breaking career. They entered the walls of this institution with a determination to shoulder, to the best of their ability, the duties and responsibilities of the Sophomore Class, their predecessors, and it was not long before registration was completed and their classes were begun in earnest. Owing to the different localities of the buildings and departments of the University it was difficult to combine the Freshman classes into any effective organization, and it was only due to the enthusiasm and spirit that such a combination was accomplished.

As soon as all programs were adjusted and the routine work begun, the Class held its first meeting for the purpose of electing officers. A Class Constitution and By-Laws were adopted, and after a very exciting and interesting balloting the elections resulted as follows:

WILLIAM J. CANNON.....	<i>President</i>
MISS ELIZABETH A. WILBUR.....	<i>Vice-President</i>
ALFRED H. THOMPSON.....	<i>Treasurer</i>
MISS EDITH H. KING.....	<i>Secretary</i>
EDWARD W. THRALL.....	<i>Athletic Manager</i>
CHAS. H. WAGNER.....	<i>Sergeant-at-Arms</i>
PAUL BUSHNELL.....	<i>Class Editor</i>

The committee on the Freshman Dance was appointed, and the meeting adjourned. We then left the building in a body to be entertained at a "green" tea by the Sophomores on the spacious lawns of I street and McPherson Square. We were tendered quite an ovation, and, securely tied and painted, we were marched to the Avenue, and after gavotting around the streets for a couple of hours, we were able to break away, one by one, for our homes.

Under President Cannon's direction the dance committee soon had all arrangements made, and on November 24th, at the Arlington Hotel, the great event came off.

This year there were no athletics for the students and, therefore, no chance for the Freshman Class to develop its "stars," but in spite of this they can point to some of their numbers who have won honors in other fields.

The Class has been fortunate in keeping its organization well intact, only about twenty members having dropped out since September. The classes are also fortunate in moving to the better quarters on G street. Here the Class will be thrown together more, and the spirit which has been so well displayed under adverse conditions will have an excellent chance to exert its influence in the University.

The College of Political Sciences

THE College of the Political Sciences was organized as a separate College of the University in February, 1907. It is the natural outgrowth of a few post-graduate courses in international law and diplomacy, which had revealed the necessity for a more full curriculum, more broadly cultural, and more highly specialized and practical.

The foundation of the College is based on two principles: First, that there should be in at least one important city of the United States a special College of Political Sciences, whose entire curriculum should be organized with the one specific object in view, of training men, at once broadly and specially, for the public service generally and for the consular and diplomatic service in particular; and, second, that the most strategic location of the United States for such a college is the National Capital, for reasons too obvious to make it necessary to state them.

The courses of study extend over four years and go minutely into the theory and practice of government, international law and diplomacy, the duties of consuls economics, transportation, banking, finance and insurance, tariff policies and commercial treaties, modern history and the modern languages. The degrees given by the College are bachelor of arts, master of arts, and master of diplomacy.

Standing with the leaders as an economist and publicist, the new dean is splendidly equipped for his duties, and in the short time that he has been in charge has unquestionably proved his worth. Under his vigorous administration the influence of the College is growing and expanding steadily.

Political Science History

WHO shall decide when doctors disagree? We have learned long ago to stand with uncovered heads and bow to the inevitable when this question is applied to our learned colleagues around on H street.

Who shall decide when our Doctors of Law agree? Again we stand with uncovered heads, for we are now in a high temple (Masonic), where the privacy of the legal mind learns to counterfeit a gloom.

Who shall decide when Doctors of Philosophy disagree? Alas! nobody can.

Who shall decide when nations and communities and statistics disagree? Ah! now we have a question for those trained for the public service generally and for diplomacy in particular, but diplomats will not disagree if they can help it, and those in the public service dare not dissent.

From the above carefully propounded questions it might be readily seen how much more attractive is our lot. We Political Science students are taught to agree, for if we do not we are confronted with hard, cold facts of history, laws of economics, statistics, accounts, actual government administration and public and social laws. Our motto is, "The greatest good for the greatest number." Fine, don't you think? That is what we must teach the world. What? You ask if the world will agree? Well—er—it's hard to say; the world is, after all, pretty badly "doctored" up. We would be delighted to give our views on political theory, or the science of government, but your request to expound on the present political situation is hardly reasonable. You see, we know the elements of diplomacy, too.

Perhaps when doctors agree they will be able to look over the whole body politic and see that there is a great work to be done by the social scientist, and that at least a few men are being put into the field each year by the College of Political Sciences of George Washington University.

But six or seven will emerge from this College of the University this year, but the world must be run according to some agreement, and as there are but "Masters" and "Bachelors"—no doctors—graduating, perhaps the Class of 1912 can hit upon some plan for running the earth as it should be run.

Seniors, College of Political Sciences

HERMAN B. CHUBB, Σ A E.....Ohio

Class President 1911-12; Class Editor 1909-10;
Vice-President Enosinian Society; Calcium
Club and Brotherhood of St. Andrew.

Little, but, Oh, my! Popular with both sexes!
Dean Willis says he is to become a prominent
man in the business world; Professor Moore
says it is his duty to go into politics and elevate
the standards of citizenship, and Dean Wilbur
says that his obvious calling is the writing of
good literature. The students see no reason
why he can't do all three. For further details
see Who's Who for 1924.

RAMON L. JANER.....Porto Rico

University of Porto Rico, 1906
Graduate Teachers College
Cosmopolitan Club, 1907-1908

Don't try to pronounce the above name cor-
rectly; he answers to anything now that he
is away from Las Piedras. "Housair" can
enumerate the exports of Mars as well as the
imports of the moon. He is a star student,
sure enough.

HSIAO MIN LOUIS.....China

Imperial College of Languages, Peking, 1910

Mr. Louis is making a study of Economics,
and later hopes to take up Law. He resides at
the Legation of the Chinese Republic.

The Teachers College

TEACHERS COLLEGE has now completed the fifth year of its existence. Teachers College was founded partly in response to the growing demand for the systematic training of teachers for their work, and also in response to the requirements of the District School Law of 1906, which provided that all applicants for positions in the public schools should pass examinations in psychology and pedagogy.

The College, accordingly, has a very definite aim—to provide collegiate training for teachers. Neither the Normal School nor a general college education affords the requisite knowledge and skill for teaching in high schools. This conviction is now practically universal throughout the educational world. The normal school training is deficient on the cultural side, a college education having no specific reference to the aims and methods of the teacher's difficult and important office is equally deficient on the side of practical knowledge. Even for teaching in the grades, professional training beyond that offered in normal schools is now regarded as very desirable. It is to supply these deficiencies of the older forms of preparation for teaching that Teachers Colleges, Schools of Education and University Departments of Education have in the last decade or two been established all over the United States, until there are at present two hundred or more such institutions. Their aim is to combine a well-balanced college education, sufficiently specialized as to the subjects to be taught, with definite education in the theoretical and practical problems confronting the teacher.

In the progress of human society no public function is more important than that of education; and in the work of education no factor is more important than the efficiency of the teacher. Contributing to that efficiency are the moral character of the teacher, his knowledge and his skill. The last of these was formerly left to take care of itself. Teachers Colleges are designed to provide, as a part of a college education, this indispensable condition of the highest success.

Senior Teachers College

IT HAS been said, "Happy are those that have no history." Yet, that does not necessarily imply that those who have a history are unhappy. And we have a history, even though we should not pick up a pen and jot down one event in our whole college course; yet the mark of the class of 1912 of Teachers College, is so engraved in the workings of this college that for ages to come it will be looked upon as a model. Even upon the chairs of their class-rooms our marks will remain until effaced by some mischievous hand. Yes, our history is too well proclaimed to attempt to express it.

The time is now at hand when our class of 1912 must prepare to depart,

"And, departing leave behind us
Footprints on the sands of time;
Footprints, that perhaps another,
* * * * *
Seeing, shall take heart again."

Some of us will return for a Master's Degree next year, but others will depart forever. Needless to say our departure will be attended with great sorrow and regret—sorrow since we all must part from many fond associations—regret that perhaps we have not fulfilled our duty as we should have.

The past brings to our memory recollections of the happy times and pleasant associations which it has been our privilege to enjoy. The distant uncertain future which is to witness the fate of every one now awaits us. We know not what diverse streams may tend to mar the current of our lives, but we enter upon our future with assurance of a well-spent college course and with that determination which has characterized the class, namely, that of "being prepared in all things."

Seniors

MISS LOUISE BERRY, Σ K. Maryland

Class Editor

"Must I leave thee, Paradise,
Thee, native soil, these happy walks and shades?"

Miss Berry has three sides to her education. She learned to row at Cornell; to play "bridge" at the University of California; and the hopeless part is now being pursued—namely, writing short stories. She is now writing an "Historical Romance," an episode in the life of a fellow student.

MISS ELLEN B. BOULDIN. Virginia

Class Secretary and Treasurer

"The vintage of wisdom is to show that rest is rust, and that real life lies in love, laughter and work."

Do you ask where Miss Bouldin is from? No? Stop, listen, hear her say "Good morning." Now you know she's from Virginia. She hasn't changed one bit by her association with us. The University of Virginia moulded her mind and speech.

MISS ESTELLE A. GOODMAN. New York

"All the world's a stage, and we men and women
but players"

Miss Goodman in disposition is most magnanimous. She leaves all the honors to her fellow students, whom she loves. Her favorite pastime is figuring how much better than Julia Marlowe she would be if she had Julia's chance. Her taste for the stage was cultivated in the great city of New York.

MISS ALICE E. HASLUP. Maryland

"O'er wayward youth wouldst thou hold firm rule
And sun thee in the light of happy faces,
Love, hope and patience, these must be thy graces,
And in thine own heart let them first keep school."

Miss Haslup is from the sunny South, too. We know that from her quiet, easy manner, and no one would doubt that she received her early education in Baltimore. She is the wonder of her class. Think of being principal of a Washington school, and going to college, too.

MISS H. GERTRUDE ROLLINS. Michigan

"Wit is the flower of imagination."

Miss Rollins is the class naturalist. She comprises the whole ornithology class, and is her own instructor, too. No one else can tell us about birds. I wonder if she'll make the bird trips alone this year? She's a lover of outdoor sports, as all Western girls are. Her post-graduate work will be a course in skating and tennis.

Seniors

MR. EDWARD WIEST Pennsylvania

Class President

"Rapt with zeal, pathetic, bold, and strong,
Rolled the full tide of his eloquence along."

Mr. Wiest's long suit must be "love-making,"
or he could not have had such a fellow feeling
for "Darcy" in his proposals to "Elizabeth."
Where do you suppose he learned the art? Not
at George Washington. It must have come in
his course at Franklin College.

MISS HELEN M. EVANS, II B Φ . . Dist. of Columbia

Class Vice President

"Wisdom is the principal thing, therefore get wisdom;
and with all thy getting, get understanding."

Taking a college degree is no new thing to
Miss Evans, as she has already received a B. A.
in the College of Arts and Sciences in the Class
of 1908. She graduated with distinction in
her class and held a University Scholarship
throughout the course.

MISS HELEN GILLISS District of Columbia

"Learning is my sole delight."

Miss Gilliss is the class artist. You should
see her zoology note book. Her drawings were
the envy of the class. How could she see so
much through the microscope? She is a born
naturalist, though. You will find her charming
butterflies, and even toads, when they appear.

The Law School

THE George Washington University Law School dates from the year 1826, when it was founded under the headship of the Hon. William Cranch, Chief Justice of the Circuit Court of the United States. But owing to the ambitious schemes of the founders, the new school soon became deeply involved in financial troubles and was forced to suspend until 1865, when it resumed work in the Columbian Law Building, on Fifth Street. From these quarters it was removed in 1884 to a more suitable location on H Street.

Counting from its establishment, it is one of the oldest colleges of law in the United States, and from the date of re-establishment it is the oldest in the District of Columbia. It was the first school in America to establish a post-graduate course leading to the degree of Master of Laws.

The course for the degree of Bachelor of Law extends over three years, requiring a total of thirty-six hours' credit. There are special courses leading to the degree or Master of Patent Law, Master of Laws and Doctor of Jurisprudence.

Among the graduates of the Law School are to be found members of the Cabinet of the United States, members of the United States Senate, members of Congress and many justices and judges of the courts of the United States. The excellence of the courses and the merit of the instructors of this department of the University have won it a well-deserved place among the leading law schools of America. The faculty has been especially fortunate in obtaining the services as professors and instructors of many men of national and international fame, among whom are the following:

Justices Harlan, Strong and Brewer, of the Supreme Court of the United States; Hon. William Cranch, Hon. Caleb Cushing, George Ticknor Curtis, Hon. John W. Foster and the Hon. Hannis Taylor. Prominent members of the present faculty are: Judge Stanton J. Peele, of the Court of Claims; Judge Wendell Phillips Stafford, Associate Justice of the Supreme Court of the District of Columbia; James Brown Scott, member of The Hague Conference Committee; E. C. Brandenburg, author of *Brandenburg on Bankruptcy*, and Dean Charles Noble Gregory, well known as an authority on international law.

The Faculty of the Department of Law

Senior Law

DOUGLAS G. HUDSON.....	<i>President</i>
A. L. BARBER.....	<i>Vice-President</i>
J. BALLARD MOORE.....	<i>Secretary</i>
PARKE A. GALLEHER.....	<i>Treasurer</i>

THE class of 1912 possesses numerous advantages which enable it to gaze with disdain upon the ambitions of the other classes at the Law School.

In the first place, ours is the only class now in school which was here when the school was in the old building at Fifteenth and H streets. This gives 1912 a chance, of which it takes generous advantage, to speak in lofty terms of the old days under Dean Vance. This attitude duly impresses the lower classes with their inferiority and is conducive to the proper respect toward upperclassmen, it being the custom of the law to revere that which is aged.

Another unique feature of the career of 1912 is the fact that it has had a new Dean for every year of its stay at George Washington. We started with Dean Vance, continued with Dean Lorenzen, and now Dean Gregory is completing the work.

In connection with the above statement, invidious remarks have been made by jealous members of the lower classes to the effect that no Dean could stand the task of instructing the class of 1912 for more than one year. This base calumny is unworthy of our notice, and so is treated with the dignified silence it deserves.

The course of the class of 1912 through the University has been chiefly marked by hard work, interspersed with periods of relaxation, at which the burdens of the class rooms were momentarily forgotten in a flow of wit (and other things). Our Freshman smoker was held, as befits Freshmen, at the Y. M. C. A. We took a long jump the next year to Endres. Our Senior affair was held where we could be near the influence of the school, that is, at the Fredonia. This was an enthusiastic gathering and the speeches of the Dean and other members of the faculty, not to mention the remarks of the coming stump speakers among the students, were choice bits of oratory.

Our Senior year has, of course, been our best, the main being the necessity of associating with the Juniors in Property III. But this is made up by the Moot Courts, where no Junior dares to enter. The battles that have raged across the counsel tables, with citations and authorities for shot and shell, would do credit to the Inner Temple. Even Dickens' famous case of Jarndyce vs. Jarndyce has its counterpart in the case of Stimpson vs. Broadstreet, which has been wandering from court to court during most of the winter.

But we are nearly through now, and when we look back over our course at George Washington, it seems to have gone by very swiftly. Time has mingled the work and the play into one harmonious whole. Many firm friendships have been formed here, friendships which will surely survive the inevitable parting and last through life. So it is with genuine regret that we leave the old scenes and the old faces, and join in the scramble for clients. We have done our best while here, but it is our earnest hope that the classes following will do even better, and that they will strive to the extent of their ability to keep the Law School of the George Washington University in the forefront of the law schools of the country.

JUNIOR LAW

A Fragment

The time has come, the Junior said,
 To speak of many things,
 Of *absque hoc's*, and hearsay rules,
 And the misery each brings;
 And when examinations come
 Why memories have wings.

We *Otto Buck* up here and now,
 Rub off our *Rust* and shine,
 For after all we're pretty *Fehr*—
 Perhaps we're *Moore*—we're fine.
 He who knocks in truth deserves
 But "punishment condign."

That there's no *Rose* without its thorn,
 By this class is disputed
 That Mother *Hubbard's* cupboard's bare
 Is a question still much mooted
 The *Straw* that broke the *Campbell's* back
 Is here, but *Campbell's* scooted.

It's clear our class is hoodooed quite.
 Our numeral is '13.
 We have a *Berden* had to bear,
 Could we but have foreseen!
 We thought that we were *Young* and *Strong*,
 But found we were but green

Among our number we can count
 More great men than a few.
 Great *Alexander* heads the list.
 (The *Phillies* have one, too.)
 Our *Spencer* is not him of old,
 This one is strictly new.

Some classes find law hard to learn
 We get it from the text,
 While *Moses* leads us through this life,
 We never can be vexed.
 Since we've a pass from *Peter*, now,
 Why worry about the next?

JOSHIAH ALEXANDER VAN ORSDEL

JUDGE VAN ORSDEL studied law in New Castle, Pa., and in 1906 received the degree of LL.D. He was admitted to the bar in 1890, located at Cheyenne, Wyo., 1891, was elected Counsel and Prosecuting Attorney, Laramie County, Wyoming, in 1892; member of the Wyoming House of Representatives in 1894; appointed by the Governor as Chairman of the Committee on the Revision, Compilation and Codification of the Laws of Wyoming in 1895. He was the Attorney-General of Wyoming, 1898-1905; Associate Justice of the Supreme Court of Wyoming, April 15, 1905, to February 1, 1906, when he was appointed Assistant Attorney-General of the United States, remaining as such until November, 1907, when he received the appointment as Justice of the Court of Appeals of the Dis-

trict of Columbia, where he has remained to the present time. Thus it has been the pleasure of the students of G. W. U. to listen to the Judge lecture on Water Rights and Irrigation since March 17, 1908, always ready and willing to answer the most perplexing questions of the Law of Irrigation, unless it was the impudence of some poor boy in the Land Office to think that because it has been a long time since the Judge was "on the ground," he was better fitted to answer the question.

FRESHMAN LAW (DAY)

PROVERBS XIV, A cheerful lawyer is like a patent medicine, but a poor liar driveth away clients.

HERE are many classes in our school,
Many who've followed the strictest rule;
But if you consider them all, dear dean,
Can you find one like nineteen fourteen?

Nineteen thirteen needs mention—slow but good,
They might wake up if they only would,
They may yet be something—'tis to be seen—
And be like us of nineteen fourteen.

Oh, nineteen twelve! they're apparently wise,
Still they are as dead as you may surmise,
And if they continue at a rate so mean
Will they make good as will nineteen fourteen?

+

Our Prayer

O powers that be, make me sufficient to all occasions.
Teach me to know and to observe the rules of evidence.
Give me to mind people's business at all times and to lose no good opportunity to use my tongue.

Answer me in my cry to the moon to find rich clients.

When it is appointed me to suffer, so far as may humanity be possible, take example from the dear well-bred beasts, to go quietly away, to bear my sufferings alone.

Give me to be always a good comrade, and to view the passing show with an eye constantly growing keener, a subtley broadening and deepening day by day.

Help me to win my case, if win I may, but—and this, O powers! especially if I may not win, make me a good loser.

FRESHMAN LAW (NIGHT)

SHORTLY after the Freshman Law Class had completed its enrollment, a preliminary organization was elected, with Mr. Kittridge as chairman and Mr. Arbaugh as secretary. It was decided to hold a smoker, this being the best means to get the men together, so that they would know each other and pass upon candidates for officers in a permanent organization.

A committee composed of Messrs. Wolfe, Clark and Chamberlin was appointed to take charge of the smoker. It was held in the rooms of the organization of Washington Bank Clerks, and all professors of the Law Department were present and responded to toasts. A musical programme, in addition to a fine assortment of refreshments, were also supplied. The room was decorated with club pennants and palms and proved an ideal place for the smoker.

A few days after this smoker the meeting was held for the nomination of officers, and at the election shortly thereafter the following were elected:

E. S. WOLFE.....	<i>President</i>
V. D. NICHOLSON.....	<i>Vice-President</i>
A. F. KITTRIDGE.....	<i>Secretary</i>
A. B. GALLOWAY.....	<i>Treasurer</i>

The organization has proven a very enthusiastic and loyal one. This is shown by the fact that the proposition to assist the students to defray the athletic deficit was responded to very generously, this class giving the second largest amount given by any class, and also adopted unanimously the proposition to impose an athletic fee each year. The scholarship of the class is excellent, and the fact that the Honor Committee appointed by the president to supervise the holding of mid-year examinations had absolutely nothing to do and was not called upon to consider a single case, shows that the individual standing of each member is beyond question.

Medicine

The Department of Medicine

THE MEDICAL DEPARTMENT of the George Washington University was the seventeenth to be established in the United States. It was established in 1825, almost with the College itself. Originally, like all other medical schools at that time, the course was but two years of five months each. It has been gradually lengthened during the intervening years until now it covers four years of eight months each. The University Hospital was made a part of the department in 1898, which greatly increased the facilities for actual practical work as well as class room work. The Medical Department has been for several years a member of the Association of American Medical Colleges, and its students and graduates have all the advantages arising from such membership. The school is also one of the seventy acceptable medical schools of the Medical Association and one of the very few medical schools in the United States accredited in full by the Medical Examining Board of England.

The teaching in the first two years is largely laboratory instruction, and in the last two is mainly clinical.

The Medical Building was erected in 1902 for the purpose and is modern in design and construction. The laboratories are well equipped, the library is large and comprehensive, and the pathological museum contains a great many valuable and interesting specimens.

Washington opens to the student of medicine the unrivalled resources of the Library of Congress and of the Surgeon-General's Library, which latter is the most complete in the world.

GREAT are the burdens of the Class Editor when he attempts to summarize the activity of the present Senior Medical Class. Perhaps the class will be best remembered by the members of a much harried faculty as "The Kicking Class." It seems that from the time of our first connection with the University various matters would come before the class and the Class Presidents were well-known figures in the waiting-room of the Dean's office. In justice to our Dean let it be said that he has always met the class more than half way in any changes that could be suggested.

Our third year seemed to pass so quickly, the work was the first taste of the real clinical portion of medicine and, oh! how much we thought that we knew. The fourth year finds us standing on the threshold of our careers, when we leave the shoals of college life to strike out in the deep waters and face the difficulties of starting out for ourselves. We look back upon our school life with mingled feelings of pleasure and sorrow. We've enjoyed the work for the most part, yet it all seemed so hard while we were going through it. Those of us who will be so fortunate as to leave the school this year cherish many memories of the good times of college days and their occupations. Of the original thirty-four that started, there are but twenty-two left. We have had new-comers for a year or so, and some of them are still with us, making the present number twenty-eight.

In closing we wish to thank the members of the Faculty for their services, most of which have been gratuitous and often at times conflicting with the office hours and the many other demands upon the busy physician's time. We wish to commend the school spirit that has grown up for the Medical School in the last three years, and we hope that it will grow and be a great factor in drawing men to the college and making the George Washington Medical School the school that it should be and an object for envy by all the others. Let's spread the good word and blazen abroad the name and the fame of our college.

Senior Medical

Five Year Class

"Build me straight, O worthy Master!
Staunch and strong a goodly vessel,
That shall laugh at all disaster,
And with wave and whirlwind wrestle!"

IN SEPTEMBER, 1907, without much ado, there assembled a quiet and determined number of young men for entrance into the Medical Department of George Washington University. Many of those who elected the five-year course were of more mature age than the average college freshman, and most if not all the numbers of the class chose this course because they were forced to earn a livelihood in various capacities. While we came from far and near with varied ideas yet we were of one accord in seeking ways and means of fitting ourselves to go forth in the world doing good to others in preventing, curing and alleviating the sufferings of our fellowman.

With our motto as "One for all and all for one," we boarded the good ship "Class of Nineteen-Twelve" and set forth upon our series of cruises. During most of the time we have sailed under fair skies and upon placid waters, but many times we have been buffeted about by troubled seas. While the Sea of Medicine with its many inlets has been the domain upon which we have traveled, we have kept near the shore venturing seaward only after thorough soundings. Our cruises will be spoken of briefly as follows:

FIRST YEAR:—Our ship's crew of twenty-seven members was a motley affair. Recognizing that a pilot was the first essential, we chose one of our number to steer the ship. On each succeeding cruise we have chosen a new pilot so that the labors, though not arduous, might be distributed. Each and all were good pilots and merited the thanks of their fellow members. Keeping near the shore we entered Histology Sound where our edification began. The lid was removed, as it were, and we had many peeps into the minutiae of man. New acquaintances were made and many of us met such fair damsels as Carry O. Kinesis and Amy Tosis. Sojourning here for a while we entered the Gulf of Chemistry and visited the various ports upon it in seeking material for future construction. Prof. Monroe introduced us to Carr Bon and also to his particular friend, Mr. Barker. Several of the boys were presented with benzine rings. It is "in the air" that Hunt still wears his. In Port "Lab" many of the boys "burst into" a vast fund of information and got things considerably mixed. Though we forget all the chemistry learned here, there are two things sure to stick: Ellison's calling the roll

Senior Medical—Five Year Class

for Bailey's benefit, and Martin's "purrin" bodies as demonstrated by Prof. Phelps. The remainder of our year's cruise was spent on Anatomy Sea where by dint of hard work and with sharp knives we studied grossly the mechanism of the most complex machine of earth.

SECOND YEAR:—We cruised on Physiology Bay and along the coasts of Fauna and Flora. The greater part of the year was spent in memorizing Farmers' Bulletins Nos. 14 to 1312. A delay was occasioned by an injury to First-Class Seaman Pitt while sounding in Electro-Therapeutic Harbor. (The name Hunt should be substituted for that of Pitt.)

THIRD YEAR:—From here we passed through Diagnosis Channel into Practice Bay. Thence we ascended Bug Estuary into Pathology River. This cruise was "karakterized" by much hard work and many forebodings.

FOURTH YEAR:—Here on Practice Bay we lingered long and drank deep and full. When we went before him, the "goodly man" was evidently not satisfied with the "might works" done by some of us. We sailed into "Baby Bayou," the King's real adjacent to Boveeland. In this region we prepared for a long stay because great is the wisdom which emanates from these realms. Later our "organ-ization" ventured into Surgery Sea, around and about which lies Bordenland and such ports as Thompsonville, Shandsburg, Sowersdale, Hagnerton, Reichelderferland, and Port Wellington. From storehouses in these parts we filled our hold, and hope to hold our fill. We shall never forget White Point Lighthouse, which was ever a beacon light to warn us of Scilla on the one hand and Charybdis on the other; i. e., that our bones might not be fractured nor our necks dislocated.

FIFTH YEAR:—On Surgery Sea we continued our journey, venturing again into Baby Bayou and Boveeland. Further on we cast our eyes across Eyelet Sea, lifted up our voices on Earlet Sound to be wafted through Laryngology Channel, and at last we rounded Noseland Promontory to draw near our "home" at Saint Elizabeth's on the hill.

Our vicissitudes have been many, our pleasures more. From the band of twenty-seven who began their first cruise on the unknown seas, we have melted in the crucible of Time to a union of eleven, each with the motto ever in mind, "One for all and all for one." The old ship has weathered many storms but has come out with colors flying, the deck cleared for action, and with each of the crew ready for the fray against the common enemy—the greatest of all mankind—disease.

"Aye, tear her tattered ensign down!" Never! Now that a fleet of vessels is soon to be launched to take her place, and since we are preparing to abandon the old hulk which has served us so well, let us behold in reverent silence the relic of the "Good Ship Nineteen-Twelve," nail her flag to the mast, and set her adrift upon the "Sea of Time" that she may be enveloped by friendly waves in a last farewell and fond embrace.

Senior Medical Day

✱

WILLIAM OTIS BAILEY, Φ X

"Ichabod." "The Unkissed Son." "Bill."

A very unprepossessing young man with a decided aversion for the fair sex, but fell for the one in particular. Some student; the apparent butt of the jokesters, but one who might show them something. He has the straightest face on earth, and says: "I can't see the point." His specialties are: "Who Struck John?" and "Social Platitudes and Plaver."

DANIEL LeROY BORDEN, Δ T Δ, Φ X

"Dan." "Another Late Student."

First in work, first in study, and first in the hearts of the nurses is Dan's program. If you don't believe it ask Columbia Hospital, where he has spent two such successful years. He says that he is going to change the above just a little when he graduates and make it "Wine, women, etc.," for just a week. May he succeed in the future as he has in college is the best his friends can wish him.

WILLIAM HENRY BRICKER, JR.

"Brick." "Bill." "Doodles."

Bricker went to Jeff. Med. until he got busted up in a football game, and then after a year or so of rest came to our class to get his M. D. A student; likes the girls; crazy over athletics, in which he always wants to mix; great talker, bluffer, and all that. He wants to make the Navy.

SACKS BRICKER, X Z X

"Socks." "Brick."

Good hot air artist, and likes to appear wise; but, like the rest, has his failures—they are the girls, riding in Sloat's auto, and Chase's. Rare are the performers and members of the audience whose worth has not been gauged by him. Going to try to start out here in town. We wish him luck!

TRUE BURGESS

Hist! Silence!! Everything is so quiet around this man. He's one of these very quiet and unassuming men that we see so seldom in Medical College. He's tried his hand at several other colleges, and when he heard of G. W. thought he would come here. Notice—Persons reading this had better be careful in taking this at its face value. They might get fooled.

Senior Medical (Day)

*

GEORGE WEHNES CALVER, Φ X

Class Editor 1911-12

Chairman Pin Committee 1911-12

"Student, ladies' man, dutiful son—three in one. A rigid adherent to and obdurate advocate of outdoor pursuits, but the rustle of a dainty, docile, demure and diminutive damsel's dress demands that this debonair devotee of District dames deliberately deviate from a definitely determined duty and direct discerning glances on them designed to disengage them from dandified dudes."

LOUIS BERNARD CASTELL, Φ Σ K, A K K

"The Silver-voiced Songster."

Ach Loui! und for why dust you come like this? Always singing, whether early or late. Stretches the attendance time to the limit. Likes the Emergency, where he has been the pharmacist for several years. The only trouble with him is that he is married, but even that does not keep him from being the best of good fellows. We all like him, and wish him the best success possible.

SEWELL MUNSON CORBETT, Δ T Δ, Φ X

"Country." "Rummy." "Dan's Charge."

"The Baby Nurse."

The best all-around good-natured man in the class; came to us from Columbia Pike, Arlington, Va. But oh! my! the dames—they all fall for those beautiful eyes. Everybody's friend, always ready to put off for tomorrow what should be done today. His specialties are reading histories for the clinics and handling the babies. For the latter he has invented a new method. Ask him to explain.

ALBERT MONROE CRAM

This little boy is such a nice little boy. Like most children, his head is still growing. He has the biggest head in the class, and, perhaps, more in it. He intends to locate in Vermont, where he will receive the respect and admiration of the community. Some student; leaving us as one of the brightest and most consistent in the class. We can't find anything funny.

JOHN CARL ECKHARDT, A K K

"Eck" has done most everything that a medical student can try his hand at. Made great hits with the nurses at every hospital in town; one G. W. nurse in particular. The way that fellow chases around with her is shameful. Some assistant in the O. R. Seldom seen so often as heretofore on "E and F." We wonder why?

Senior Medical (Day)

WILLIAM DEHART FITZ-HUGH, A K K

Class Treasurer, 1911-12

"Billy." "Fitz."

He's run the Sibley so long that we wondered how it would go without him; then Casualty, and now T. B. He loves his books; likes the nurses better, and to them he gives one of his famous prescriptions for his "Joy Powder," and, believe me! he knows how to give them. A well-known personage about the Nurses' homes.

AUGUSTUS CLAGETT GRAY, A K K

Vice President, 1911-12

Clagett is a very demure son of old Maryland. His specialties are: 100's in the exams, bossing the nurses around, and trying to tell the rest of us how much he knows. At present writing we cannot find out whether there is a girl in the question or not, but we feel sure that the present condition will not last long. Take warning, girls!

CUSTIS LEE HALL, Δ T Δ, A K K

"Cuttie."

Formerly heart-smasher of Garfield Hospital; now doing the seminary stunt. Cuttie hates lectures, abhors recitations, detests clinics, refuses to get up in the morning, and simply won't study—otherwise he is an energetic, studious and hard-working lad. He wears an aristocratic haircut; knows the college campus from one end to the other, and delights in notices canceling assignments.

OSCAR BENWOOD HUNTER, A K K

Secretary, 1911-12

"Obie." "Reds." "Sorrel."

"Five cents, a nickel, a half a dime!" Such is the song we constantly hear. A veteran publisher, promoter of wild-cat schemes, frenzied financier, brass-lunged salesman, "Guaranteed or money back merchant." Some dancer; poet; lover and sport. His special forte is canoeing—and, by the way, he runs more chances than anyone else, and they are always successful.

HOWARD FRANCIS KANE, A K K, Z Ψ

"Pinkie."

Geo. Kane's boy went to Worcester, Bowdoin, and then to Jeff. Med., and finally came to a good school to graduate. Shark on the mandolin, ladies, brands of —, a h—l of a good fellow, but seems to be a rose among thorns here. The pink pacifier, Beau Brummel de luxe, a rectifier of spirits, and a mental nurses' register. A real good boy when he wants to be.

Senior Medical (Day)

+

CHARLES O. KNOTT

"Daddy."

A good example of tenacity of purpose, ambition, grit, determination, and sticktoitiveness. While greatly incapacitated by sickness, Charlie has kept at the work with great determination and will. Being under heavy disadvantage all through the course, it is with pleasure that we call him a member of the class and admire and respect his ability and success.

CHARLES CALDWELL LANDIS

Pin Committee, 1911-12

A person of a very sunny disposition, from the sunny State, California. Landis, as we call him, is another of these consistent students, and tries to make us all believe that this is all he does. However, we find that this young man met a certain nurse at a certain hospital here in town, and—but oh! you nurse!

LOUIS ANATOLE LAGARDE, JR., A K K, Δ T Δ

"Tolly."

Came to us from the University of Colorado in 1909. His favorite theme is practice, it giving him such a wide field for study. Said to be an inveterate and constant canoeist, the Baron Munchausen of the Potomac; Neophyte Nurse instructor, adviser and comforter; also a furious, fast, fastidious but fickle fusser. An enthusiastic entomologist.

GEORGE SPARR LUCKETT, B.S., Σ X, X Z X

Class President, 1911-1912

"Studd." "George."

Some fusser, speaker, debater, student (?); a gentleman of continued and uninterrupted leisure. He lives a mysterious double existence. Spent a most successful term at Garfield, but won't look at a girl because there's "one on the Hill." He never smokes anything but the rottenest of cigars that nearly drive us all from the class. Best liked and most sensible man in the class.

FRANK WASHINGTON MILBURN, Phar. D., K Z

A handsome youth; the flower of Alexandria. It is wonderful to see the debris from broken hearts where this young man has been. His failing is his masterful delivery of original thoughts, with which he tries to bore us all. Frank has a girl "way down in Tennessee" who is uppermost in his thoughts and plans. We wish him luck!

Senior Medical (Day)

HAROLD ALONZO MOOERS

The farmer, who seeks a leisurely acquirement of knowledge. He's somewhat of a confirmed benedict, whatever that may be. He delights in the long ride in from Takoma Park every morning and that long walk or wade through the green fields, and to hear the early morning songs of the birds, so he can get to college for 8 a. m. lectures.

ALBERT ELWOOD PAGAN, Σ X, A K K

Has strong ambition to become a real doctor. Something of an athlete; family man; society favorite; good fellow and student. Al. believes in the newness of the Great West, and is already turning his eyes in that direction. He started out rightly by going there to get a wife, and soon he will go there to get the practice that is awaiting him.

BOYD RICHARD READ, A K K

The Hatchet Editor, 1911-12

Talking of sharks, did you ever see Boyd? He is a good sport, good student, and a perfect Beau Brummel. Boyd says that he likes peaches very much; in fact, they are his favorite "fruit," of which he often goes "picking;" but he always likes it much better when he can get a "date" with one and make it a "pair."

JOHN ADOLPH ROLLINGS, A K K

A quiet little chap who is so retiring in his manners. A near student, quiet observer, and an enthusiastic equestrian. He loves horses and the country in general. Adolph came to us from West Virginia, and we wish that the State would send a few more like him to enter into our college life. It would be better for us both.

GUSTAVUS ADOLPHUS SCHAUB, A K K

"Doodle."

He's quite modern in his beliefs—in that a man should have more than one wife. Notice the number of his friends! He's also the adviser and confidant of the great and acts for us in the capacity of censor of morals. He can give a line of josh equal to the best, and make almost anyone believe it who does not know him.

Senior Medical (Day)

*

JESSE IRVING SLOT, X Z X*"Irvie."*

An ardent automobilist. May often be seen on the local "Great White Way" as the center of attraction of a bevy of ravishing blondes, for which he has a special failing. He likes to be used to demonstrate fractures so he can get them the next day. "Little but loud." Irvie's special failing is these "Joy Rides." Oh, what we know about you!

NICHOLAS JULIUS SCARITO, X Z X*"Sheets," or "Skirts."*

The right reverend, whose long suit is to translate for the clinics all the unpronounceable jargons of the patients, thereby making some hit with the Prof. An ecclesiastical benedict slipping one over on us without our knowledge one afternoon. A neurologist and discoverer of nerve trunks, especially the sciatic.

JAY ATWOOD WHITAKER

A wild, wooly, wonderful Western wrestler. An advocate of the Tuesday morning mustard plaster. A married man who emulates the rights of a bachelor. Wonderful student (?), of pronounced but little-used talents. He likes a rough house better than a square meal, and always wants to start something.

Senior Medical Night

✱

GILBERT ROSCOE BREWER..... Illinois

Class Editor, 1911-12

With the name of the illustrious jurist, and a distinguished surgeon, for an inspiration, this member of the persevering eleven bids fair to have his name added to the others, especially since he hails from the State which has produced so many noted men, including "Uncle Joe."

ROY EDGAR BURNETT, B. S., Φ X, K Σ,
..... Oklahoma

"Roy"

Though hailing from the home of the "brave," he shed his war-paint "and all that sort of business" before joining us; and, so docile has Burnett been ever since, he would not stoop to throw a "donnick" at a living creature. This "Damon" has mourned the loss of his "Pythias," who left us for Columbia, until we half suspect this as being the true diagnosis of his present ailment. "I-gad."

JOHN CHRISTOPHER DYER, Φ X..... Ohio

"J. C." possesses the original "Van Dyke." He has the bearing of a full-fledged M. D., except during Dr. Bovee's quizzes, when he journeys skyward "and etc.," "and all that sort of business." Though he has labored under conditions which seem almost unbearable, we predict for Dyer great success in the field of Medicine.

EVERETT M. ELLISON.....
..... A. B., A. M., Φ X, Tennessee

"Henry"

"Henry" is a true product of the Volunteer State, and, what is more to the point, he generally makes good. Besides having served his country in sundry and various capacities, both at home and abroad, he has served his class as its president and otherwise. He is now a volunteer for service in that vast army that is engaged so earnestly in the protection and saving of the health of the nation.

CHARLES E. FISHER, Φ X..... Pennsylvania

"Charley"

I am somewhat at a loss to extol the virtues of this noble sire, for it goes without saying that Fisher is all right. Gently now! I can see that mammoth smile wreathed around Ellison's face which suggests: "Remove the cause, treat the case dietically and hygienically" and give "therapeutic doses of plaster from the wall," and the prognosis is not bad for the evolution of one of the best "Rectum Specialists" in California, where Fisher proposes to locate.

Senior Medical (Night)

✱

ISAAC BURTON HUNT, B. Accts. Tennessee
"Ike." "Honest Abe."

Were you to ask this chap where he hails from the answer would come quickly: "From Middle Tennessee, Suh! The best country that the sun ever shone upon." "Ike" is one of the few boys on whom you can always depend. Tall, lank and wiry, he reminds one of that other noted Tennessean—Andrew Jackson.

GEORGE FERREE LEONARD, A. B. North Carolina
"Tar Heel"

Secretary-Treasurer, 1911-12

This lad joined our crew on its second cruise. No one in the class has been more attentive to duty than Leonard, the original "A" man with Dr. Shands. The only smile ever seen upon this lad's face is when Hunt has finished one of his *Ladies Home Journal* stories. Leonard boasts of his native State, and she has no cause to disclaim him.

AARON WISE MARTIN Virginia
"Marting." "Marteeny." "Wise Old Bird."

Ex-member of the D. C. Ambulance Corps

President of Class, 1911-12

This big chunk of humanity hails from Southwest Virginia, where the "worm" dieth not and "mountain-dew" is found a-plenty. He is a diamond in the rough. His greatest sin is associating with Hunt and Brewer. "Marting" can turn out more work in a given time than any other living man. The editor time than any other living man.

CHARLES E. RALPH Illinois
Vice President of Class, 1911-12

"From thy prairies, verdant growing, Illinois," comes the call of the neighbors of Ralph to come back amongst them. Though Dr. Bovee would disown him, his neighbors will not. Ralph comes to us from the greatest State in the United States, as can be proven most readily by the editor

EFFIE ALBERTA READ
. A. B., A. M., Ph.D., Massachusetts

This medico came to us from Cornell. She is short of stature but long on names, as evidenced by the above. Miss Read is one of Dr. Wiley's "Original Squad." For years she was keeper of the class exchequer as well as class secretary. In the near future we see Miss Read ably assisting Dr. Wiley when he receives the portfolio of Secretary of the Department of Health in the President's official family.

JUNIOR MEDICAL

"WELL JACK, WHAT DO YOU KNOW ABOUT THIS?"

SOPHOMORE MEDICAL

INDEED, September 28, 1910, may be regarded as the most fortunate day in the annals of the George Washington Medical School, for on that day the class of '14 entered the portals of the school in whose life it was destined to form so prominent a factor. We entered the school a large and enthusiastic array, thoroughly disorganized, and almost entirely unacquainted with each other and with the school. Strange to say, no fireworks or general thanksgiving celebrated our coming. No delegation from the faculty and upper classmen welcomed us on our arrival. We created no profound sensation. Indeed, the only ones who seemed to take any notice of our coming were the Sophs, who had prepared a rather warm reception for us. For a few days they lorded it over us until the class of '14 began to sit up and take notice. Then we got together and turned the tables on them. Since then we have made matters interesting for all comers, including the present graduating class.

To do justice to the history of our class in these few words would be impossible. The achievements of the class of '14 have been great and many. They have extended to every field of school endeavor. In the social life of the school and in baseball, especially, the second year has done its share. We put on the field last year a championship Freshman team and we expect to excel again this year. Indeed, we have been exceedingly active. Bashfulness and shrinking modesty have never been among our besetting sins. Mark Twain says, "Blessed is the man who bloweth his own horn, lest it be not blown." So what's the use in being backward?

One of the crowning triumphs of our class has been allowed to pass unnoticed. Although the fact is not generally known we are champions and exponents of the plan to secure phonetic spelling, which sometime ago attracted so much attention. We not only advocate this, but practice it—that is, some of us do, especially, on the blackboard—and if the spelling records on examinations had been preserved they would prove it beyond the shadow of a doubt.

The chief characteristic of the class of '14 has been its spirit. This spirit immediately showed its effect on the whole school. Our class has considerably thinned in numbers. Some of our most valuable members have left us, but there have been some additions, and the spirit is still there, and as long as the class remains it will be doing business at the old stand in the same old way.

LEOPOLD VACCARO, A. B.....	New York

WELL! Well! Here we are, the "youngsters" of the Medical Department.

On our arrival last September at G. W. U. we received a most cordial welcome from the upper classmen and faculty. A fortnight later we held our first class meeting at which time we drew up our constitution, adopted the honor system and elected the following men to office: President, P. S. Putzki; vice-president, C. S. Fitzhugh; secretary, J. McNally; treasurer, R. K. Thompson; editor, I. A. Rowlson. During the course of the year we lost three of our original number. But we consider that our loss has been made good by the arrival of Peters and Collins, for as "Dutch" is from "Ole Virginny," he easily makes up for two ordinary men.

After studying diligently on anatomy for about six weeks we made our debut in the dissecting room. That certainly was a memorable event, for what some of us lost on that eventful morning would surprise the "tenderfeet" of the deep blue sea. However, we soon recovered from the shock and have done our work so well since then that now any one of us is perfectly capable of writing a book on anatomy.

But anatomy is not the only subject that we are well versed in. We were the pride of Dr. Lawson in Histology and Embryology. Then there was Chemistry, but the least said about that the better. It was in Histology that we discovered that we had a student of some note in our midst, for it was in his class that "Brad" gave Dr. Titus a most complete explanation of the degeneration of bone marrow. I believe that he said the causes of this phenomena were "starvation and old age."

In November, we had a "smoker" at the home of our president. It was a most enjoyable affair and we were all able to find the key hole when we reached home. Later in the winter we had a little theater party at the "Baptist Church." A baseball team was organized, with J. F. Ligon as captain, and Frank Chamberlain as manager.

Thus we stand ready for our final examination in our Freshman year, which will thrust us mentally into the arena of Sophomoredom.

HISTOLOGY.

CELL SHOWING WALL AND
WELL DEFINED NUCLEUS.

UNIVERSITY HOSPITAL

THE HOSPITAL is an integral part of the educational system of the University. All the professors teaching clinical branches have been made chiefs of their clinics in the hospital, thus making the clinical facilities of the hospital directly available for teaching. The total capacity of the hospital is one hundred and twenty-five with forty rooms for private cases. Over 13 per cent of the work done by the hospital is on charity cases for which no remuneration is received whatever.

Senior Nurses

WHAT the Hospital ever did before we entered we cannot imagine. We shudder to think of its miserable existence after our departure.

"Muffett" was destined to lead us in our long three years' march. We followed her through the open gates of E. and F., for it is there all the "green-horns" are placed. When we passed downward to the diet kitchens we were a sadder but wiser lot, for had we not mastered the art of reading a clinical thermometer, taking pulse and respiration and entering them more or less (usually less) correctly in our charts?

In the diet kitchen we staid for two months, but only to come out and be thrust into eternal darkness—night duty. For three long months we dodged imaginary ghosts in the corridors, late at night and in the wee small hours of morning.

When we came forth again into the daylight we were truly thankful. At the end of each month another fear beset us. Who could tell which of our number would be plucked from our midst and sent to Casualty? It was our fate, collectively, but who did not weep and wail when her five exciting months were up and she was sent back home.

Well we remember our first special. Some had more than their share, while others less fortunate craved it greatly. It's not all of us that attain that dizzy height—supervising—for we cannot all be tall and imposing and commanding.

But verily we believe the O. R. to be the final triumph! At any hour of the day or night we are called forth in all our glory to wield sponges and clinic! Truly it is the invention of his Satanic Majesty. But such is the life of a nurse.

Spread bountifully between these special attainments is plain old ward duty. Day after day we float peacefully along on its placid bosom, only at last to encounter some whirlpool and be borne to some other channel.

No matter where we are we are never sorry when hours of relaxation come. But we can never quite forget about the hospital. In the early part of their training, two of the girls had been duly impressed with hospital etiquette and had religiously risen for every doctor for miles around. That night they had gone to a near-by drugstore and were seated at a small table eating ice cream. One of the internes came in, and like a flash they both arose. Never will they forget the astonished looks they received from the people in the store.

Occasionally we have a dance and then we do some hustling, not that we haven't hustled all day, for we have, but we go to a dance, dance half the night and never feel it—until morning! How we hate to get up! But we're usually better off for having gone.

We will miss each other, and the Hospital terribly, and will be very lonely when we leave, but our work has only begun, and if we mean to follow our profession successfully we will have to be more grim and determined than ever we were when we entered.

Senior Nurses

SUPT. OF NURSES
Miss B. B. THOMPSON

HEAD NURSE IN O. R.
Miss DORA KRIBS

Miss ANDERSON Pennsylvania

The opposite sex she holds in scorn,
The hatred seems within her born;
But for three long years the question has been—
"Andy," where did you get that Yale pin?

IDA CARSKADON West Virginia

Why Carskie left Clarksburg
We've never found out.
We believe though, she knew
Just what she was about.
If she gets tired of nursing
She has only to stop.
In her wonderful bear dance
She need ne'er feel "de trop!"

Senior Nurses

ELIZA CHINN.....Virginia

She's the soul of propriety
And all that is meek;
When her rights she stands up for
Her voice is quite weak.
She's really an angel,
But, alas, for our boast,
For these quiet, reserved girls
Need watching the most.

ROUTH DORSETT.....Maryland

Instead of a laugh she has a giggle;
Instead of a walk she has a wiggle.
In spite of this we love her still;
We always have and always will.

LILLIAN JOLLIFFE.....Maryland

Airy, fairy Lillian, with locks of raven hue,
'Twas a glad day for G. W. when across our path you
blew.
You live up to your name and are ever the same—
Jolly either night time or morn;
For you are the best and excel all the rest
Of the happy-go-lucky girls born!

LELA SISK.....North Carolina

In the matter of dimples she's more than her share;
And also we envy the shade of her hair.
Her admirers are many—the stork with the rest;
For "Sis" in the nursery is abundantly blest!

Senior Nurses

ELFRIDA LUNDIN.....Sweden

Would the moon and the stars in the sky at night turn?
Would the sun in the daytime a different course burn?
They're not likely to do it, but more likely than you
Are to change an opinion you form, and think true.

ALICE MELTON.....North Carolina

With more airs and graces than European queens,
Like a peacock, her plumage she visably preens.
But—candy and flowers and things girls like best,
Ginger can usually outstrip the rest.

JANE MORGAN.....Virginia

We could never live without her,
This child whom we all call Jane,
For her smile is like the sunshine
That follows the April rain.
And her heart is just as happy and gay
As any bird on the wing;
Dear Jane, we are crazy about you,
And think you are just the real thing.

EMILY MOWATT.....Canada

"Little Miss Muffet" came here to stay;
We're glad that no spider frightened her away.

Senior Nurses

ETHEL RAYMOND.....District of Columbia
 We feel our class dignity all centered here,
 For you've really more than your share, my dear,
 In some private things (the business of nobody)
 We hope you relax some for the sake of "Your Waddy."

ELIZABETH SMITH.....Virginia
 "Smithers," you're truly the pride of our class!
 We would fain send for you when some heart we would
 smash.
 You take your departure this leap year—and then!
 All we can say is this: "Pity the men!"

LAURA SPENCER.....North Carolina
 Lady Spencer, we could never exist without you!
 You're a wonderful blarney—a diplomat, too.
 When momentous questions arise, we all sing,
 "Ask Lady Spencer, she knows everything!"

ANNIE TOMLINSON.....England
 Tom, Tom, the piper's son,
 You're not unlike the other one.
 In England what terrible deed have you done
 To cause you to come to us on the run?

MISS EVA MAY BOWEN.....	Maryland
MISS I. PAULINE BARBER.....	Maryland
MISS ISABELLE PRICE.....	North Carolina
MRS. IVY B. CASHELL.....	Maryland
MISS NAOMI JONES.....	Pennsylvania
MISS LILLIAN DRYDEN.....	Maryland

THIS is to be the short history of a journey still unfinished—which, with the closest reckoning must cover three years. At present our most sincere hope is that it will not last longer—though we do not doubt that, after the final destination has been reached and we have entered a larger country, we will look back with tenderest recollections upon our happy intercourse here.

Against the dangers which beset our way we each carry a talisman—an earnest wish to be of some practical use in the great war against suffering and disease.

A strange thing about this journey is that, while, we often struggle side by side, very few of us started together; and when we reach the gate leading into that other country we must go in one by one.

In turn we have struggled through the initiatory training on "E and F," where we were almost lost in the maze of terms and duties of whose existence we had never before dreamed. A few of our members were lost to us there, but those left have gone on through the narrow dark way of the "diet kitchen" which led out into a broader vista—"work upon the private wards." While enjoying that, suddenly there loomed up before us a gloomy pass—"night duty"—out of which we emerged only to find ourselves confronted by a steep, almost unaccessible mountain which for some bore the name special duty, for others of larger frame "superiorship." At this time a few of our class have reached a generally popular field of labor, that land of eternal youth, the nursery.

The rest of our journey lies before us—the end no man can tell—only time proves all things. But in the natural sequence of event this story will be a continued one.

NURSES, CLASS 1914

IT SEEMS presumptuous for such a young infant as the first year class to raise its feeble voice in the presence of such dignified and august personages as the Seniors, but we have been told to do so, and we must obey. To obey without question is the first lesson we learn, and we consider that we have learned it pretty well so far. Now, what we can say we don't know, for we are too young to have a history yet, some of us being not more than two months old. At first we decided to leave training after about a week's trial, but after we had shed a few tears and been comforted and lectured by our Seniors we decided to stay a little longer, and, really, we're beginning to like it. After the scrubbing period and the water-pitcher stage is over things look a little brighter now and then and we get into the habit of looking forward to the bright times. Perhaps that is what holds us here.

But after our three years are over and we have started out to fight our own battles we will realize that it wasn't the bright things that taught us the most, but the hard experiences which are so distasteful now. Out of twenty-four who entered the class twelve have stayed. We hope to be twelve at the finish, but who can tell what may happen in three years.

The Department of Dentistry

THE first course of lectures in the Dental School began November, 1887, under the title of "The Columbian University Dental Department." The course then extended over two years of five months each. Two years later the course was extended to seven months, but this additional time being found inadequate to keep pace with the ever-increasing demand for higher dental education, the course was gradually increased until now it extends over three years of eight months each.

The faculty includes many of the leading practitioners of the city. The student has at his disposal the well selected library of the University as well as the unrivaled resources of the Library of Congress and of the Surgeon-General's Library, which latter is the department ranks with the best dental schools in the country.

The laboratory and infirmary faculties are of the best and in every way this department ranks with the best dental schools in the world.

The Faculty

CHARLES H. STOCKTON.....	PRESIDENT OF THE UNIVERSITY
J. ROLAND WALTON, D. D. S.....	Professor of Prosthetic Dentistry and Orthodontia, and Dean, 702 10th St., N. W.
HENRY C. THOMPSON, D. D. S.....	Professor of Operative Dentistry
CHARLES E. MUNROE, Ph. D.....	Professor of Chemistry
SHEPHERD IVORY FRANZ, Ph. D.....	Professor of Physiology
CHARLES S. WHITE, M. D.....	Professor of Oral Surgery
HURON W. LAWSON, M. D.....	Professor of Histology and Embryology
FREDERICK FULLER RUSSELL, M. D.....	Professor of Pathology and Bacteriology
W. O. OWENS, M. D.....	Professor of Anatomy
B. M. RANDOLPH, M. D.....	Professor of Materia Medica and Therapeutics
E. G. SEIBERT, M. D.....	Associate in Chemistry
J. R. DE FARGES, D. D. S.....	Associate Professor of Metallurgy, Professional Ethics, Dental Jurisprudence and Economics

The Faculty

ALLEN S. WOLFE, D. D. S.	Associate Professor of Crown and Bridge Work and Porcelain
CHARLES BASSETT, D. D. S.	Associate Professor in Charge of the Dental Infirmary
CADMUS LINDEN ODOR, D. D. S.	Associate Professor of Operative Technics and Comparative Anatomy
W. FRANCIS LAWRENCE, D. D. S.	Associate Professor of Prosthetic Technics
NOBLE P. BARNES, M. D.	Associate Professor of Materia Medica
JULIAN GARTRELL, D. D. S.	Lecturer on Oral Prophylaxis
W. B. HOOFNAGLE, D. D. S.	Lecturer on Materia Medica
S. H. GREENE, JR., M. D.	Instructor in Anatomy
J. L. RIGGLES, M. D.	Associate in Anatomy
OTIS D. SWETT, M. S.	Instructor in Chemistry
C. G. SHOEMAKER, D. D. S.	Instructor in Operative Technics
J. WINSLOW TAYLOR, D. D. S.	Instructor in Prosthetic Technics
HENRY CISSEL YOUNG, D. D. S.	Instructor in Prosthetic Technics
HERBERT C. HOPKINS, D. D. S.	Instructor in Orthodontia Technics
E. P. MAGRUDER, M. D.	Instructor in Anatomy
D. T. BIRTWELL, M. D.	Instructor in Anatomy
HENRY I. STOUT, M. D.	Instructor in Anatomy
EWING MARVIN WOOD BEAR, D. D. S.	Demonstrator in the Infirmary
MELVILLE P. ESLIN, D. D. S.	Demonstrator in the Infirmary
JAMES N. ROBINSON, D. D. S.	Demonstrator in the Infirmary

MANLEY M. MICHAELS.....	<i>President</i>
C. W. CAMALIER.....	<i>Vice-President</i>
HARRY BINGMAN.....	<i>Secretary</i>
GEORGE E. WHITE.....	<i>Treasurer</i>
STUART M. ANGELS.....	<i>Editor and Historian</i>

TO GIVE the details of the happenings of our class, both good and bad, would require a large volume, so I will not attempt it, but will give only a meager outline. In December, 1909, there met in Lecture Hall, No. 2, one young lady and eleven fellows. The noteworthy thing of this class was that we had a young lady among us. Miss Thacker was one of the fellows, and would surely have been an honor to the profession.

In November, 1910, when the roll was called we found that three failed to answer. The two Hodgkin brothers had gone to Richmond to continue their studies, while Miss Thacker had seen fit to discontinue hers.

The principal event of this year was the initial dance of the Dental Department. The dance was given at Mrs. Dyers, and was quite a success. It was chaperoned by Dr. and Mrs. Roland Walton, Dr. and Mrs. Henry Thompson.

On January 22, 1912, the saddest event of our college life took place, the death of our classmate, Gustavus A. Bingham. His death was quite sudden and was an awful shock to his friends. His loss was mourned by classmates and faculty alike, among whom he was a great favorite, and it is the opinion of all that the profession surely lost a good man.

Last year our class gave the initial dance of the Dental Department. This year we will give a much larger affair at either the Arlington or Rauscher's. This will be the greatest social stunt ever pulled off by the department and should be quite a boost to it. Therefore, the faculty should be proud of us.

Well, our college life is most over; soon we are to part, some going one way and some another. But before we leave our alma mater, let us all work hard so that in the final finals we may each say, Veni, Vidi, Vici.

Senior Dentals

STUART M. ANGELO.....Virginia

Class Historian and Editor, 1910, 1911, 1912
Evidently some literary genius? There is lots more I'd like to say; but, being class editor, and, consequently, writer of this, I'm too modest.

HARRY BINGMAN.....Pennsylvania

Secretary of Class

"Bing" is a hard worker. He started in the infirmary in his freshman year, thereby gaining much valuable experience.

C. WILLARD CAMALIER, Ψ Ω. . . District of Columbia

Vice President of Class

"Cammie" is the Beau Brummel of the class. It's queer how some fellows make a hit with all of the fair ones.

ROBT. C. FOWLER, Ψ Ω. . . . District of Columbia

President of Class 1910

Fowler seems to have made arrangements with the faculty as he leaves early every evening. We wonder what for. It has been hinted that he is soon to embark on that troubled sea of matrimony. He has the good wishes of all.

LEON FRADKINS, D. D. S.Russia

Is a native of Russia. He graduated from the Dental Department of The Imperial Charcoff University of Russia; came to the United States and graduated from University of New Jersey, and then came to G. W. U. for the finishing touches. He will practice in Russia.

Senior Dentals

M. MANLEY MICHAELS, $\Psi \Omega$ South Carolina

Treasurer of Class 1909

President 1910 and 1911

"Mike" is a conscientious worker and generally knows what to say in the quizzes. He is thinking of going to Knoxville, Tenn., to practice.

A. ALFREDO RUBIRA . . . Guayaquil, Ecuador, S. A.

Rubira has been working under a handicap of not knowing our language very well. He expects to go to South America to practice.

GEORGE E. WHITE, $\Psi \Omega$ Massachusetts

Treasurer of Class

After spending two years with the horse doctors he decided he was on the wrong tack and came over with us. If sticktoitiveness is a good trait, "Baldy" will be some dentist. "Thash all Right."

W. CLARENCE ZEPP, Ph. G. New Jersey

"Little Clarence" deserves a lot of credit. His position as drug clerk requires every night from 10 p. m. to 8 a. m., and he is at school from 2 p. m. to 10 p. m. How does he do it? Last summer Clarence did what we would all like to do if we had the nerve. He is married now.

HELLO!" "How are you?" "Where is ———?" "You are looking fit." "I'm glad to see you all." With such salutations our Junior Year was begun —begun with a love feast and a renewal of class comradeship and personal friendships that had been interrupted by the summer vacation now to be continued and cemented into a closer union of class co-operation and common endeavor.

Upon looking the "bunch" over we found that of the sixteen who answered "Here" to the last roll-call of our Freshman year fourteen were present—a very high average. One new man joined us at this time, H. M. Spillan, of New York.

Early in the year at a meeting of the full class the following class officers were elected to guide us through the breakers of the ensuing year: Claud Durfee of Illinois, president; Charles W. Rich of Pennsylvania, vice president; John E. Hardester of the District of Columbia, secretary-treasurer; and John P. Marstella of Illinois, Editor-historian.

Before the year's work had fairly begun one of our number, Vernon V. Hooper, was compelled to give up the work and seek to regain his health among the mountains of his native state, North Carolina. While we have missed him personally we, as a class, have retained his friendship and interest as is attested by the frequent letters we have received. The class are glad to state that he has almost if not quite regained his old time vigor. "Here is to our 'Tar Heel' member, and may his shadow never grow less."

One other member of the class found the pace too strenuous and dropped out within the first two months. Our class now has the lucky thirteen, all hale, hearty, and full of enthusiasm.

With scarcely an exception there has been, not a selfish regard for personal and individual advancement, but an united team work which has carried the class as a whole well along the stony path which leads to the close of this year's work. When we reach that second mile post of our course let us all finish in a bunch, presenting a solid unbroken front with plenty of fight and determination left to still do and conquer, and when the

JUNIOR DENTAL CLASS

summer vacation parts us for a short time let every one feel that he has not labored for himself alone, but that his efforts has been for the honor of the University, the instructors and the class, and with a firm determination to be on hand when next the class convenes. No individual member is stronger than his class.

Just to show how progressive this class is and how alive it has been to further the interests of the class, letting no opportunity pass whereby this could be accomplished, the reader is requested to look at the class roll on the next page and note how many names there are followed by the "Christmas tree and lyre," the insignia of the Psi Omega Fraternity. If that isn't proof of progressiveness then Webster, when he compiled his dictionary did not know how to define the word. It also proves the statement relative to the brotherhood of the class.

Before closing we wish, as a class, to express our sincere gratitude to our several instructors who have so patiently and zealously labored to impart to us the facts and theories of our chosen profession. It is our hope that these gentlemen will long remember the class of 1913, not so much as individuals, but as a class, and in after years will often have occasion to feel proud that their endeavors have borne fruit bountifully. We hope that these same instructors will be retained for the classes to follow and should they, perchance, mention the class of 1913 may it be to the everlasting renown and credit of that class.

WILLIAMS, EDWARD, <i>Psi Omega</i>	<i>New York</i>

FRESHMAN DENTAL CLASS

THE FIRST OF OCTOBER found twenty-five ambitious "college boys" wandering around the corridors of the Medical and Dental Building, trying to find the rooms in which the freshmen were to unravel the mysteries of Anatomy, Physiology, Prosthetic Technique, and other subjects which the faculty had so thoughtfully mapped out. Having put Histology "away" we now have the Chemical Laboratory in which to spend our *spare moments*.

Soon after starting our year's work we had a meeting, organized our class, and after electing officers we felt as though we had a well-organized class. The upper classmen were loath to give us that much credit, and claimed our class to be like a "scrambled egg."

About the last of October a smoker was held by the Psi Omega Fraternity to which all the "Freshies" were invited. A most enjoyable evening was spent in which we became acquainted with the Junior and Senior Classes, and some interesting remarks were heard from noted practitioners of the city.

To the able professors, under whose guidance we are striving to become exalted "Tooth Carpenters," we owe an apology for some of the trying quizzes we have given them, but just give us "a chance for our mutton" and we will acquire the coveted "Cum Laude;" if you don't believe it ask Dr. Elliott.

June is drawing near with its final exams, and some of the "wise ones" are making up for lost time. Just watch us come down the line. We will "finish strong," coming up to face the second year with new resolutions based on our past experience.

REYNOLDS

Department of Veterinary Medicine

THE SESSION of 1911-12 marked the fourth year's existence of the youngest department of the University, and since its inception progress has been the chief slogan. More fortunate than many schools of similar character, from the beginning it had access to the well-equipped laboratories of the Department of Chemistry and Medicine.

The faculty of twenty-five members, together with a well-equipped veterinary hospital, insure a thorough training in both laboratory and clinical work.

Owing to the rapid advancement of veterinary medicine in this country, and in order to maintain the high standard recommended by both the American Veterinary Medical Association, and the United States Department of Agriculture, the board of trustees deemed it wise to establish a four years' course in veterinary medicine, commencing with the 1912-13 session. Each session will extend over a period of about seven months. Until the present time the requirement for graduation has been three years, with sessions of nine months each.

The graduates of the College of Veterinary Medicine are eligible to membership in the American Veterinary Medical Association. They are also eligible to service in the United States Department of Agriculture and the United States Army after passing the required examinations.

These few facts will merely serve to indicate that the Veterinary Department is fully cognizant of the wide field of usefulness to which its graduates may be called and the increasing responsibilities which must be borne by them as scientific veterinarians.

HARRY A. LOCHBOEHLER,..Assistant in Veterinary Materia Medica and Pharmacy

THE CLASS of 1912 entered the portals of the College of Veterinary Medicine in the early autumn of 1909, following in the footsteps of the pioneer class of the previous year, when this department of the University made its initial bow to an appreciative public.

We had scarcely found time to waver at the prospect of assimilating the contents of Chauveau's classical literature until we found ourselves delving into parliamentary procedure incident to the election of class officers, the result being that peace and quiet was resumed by the majority present when it was announced that Morcock with his thrilling verbosity had captured the presidency.

As a first-year class the only thing we lacked was sufficient caffiene to stimulate our efforts at keeping awake long enough to absorb materia medica and listen to very interesting, yet persistant and long continued descriptions of 57 varieties of epithelium, which latter subject fairly staggered our kind and patient professor of histology and overwhelmed the unsuspecting freshmen. However, with the chill of winter gone, and the breath of spring upon us, we redoubled our efforts, and by and with the advice of those who were moulding our ideas of veterinary science, we stored up great wads of knowledge against the appearance of examinations which are as certain to be visited upon us as is the depopulation of the pink-eyed inhabitants of the guinea pig and rabbit factory out at Bethesda when our class is given a clinic there.

When our junior days had come, Allman and Pagan were no longer with us, but there were added to our class membership such seasoned material as Norris, Sanchez and Baiz, who joined us in constantly making our presence known at numerous clinics, much to the embarrassment of the learned seniors, but we stood our ground and profited by their mistakes.

During this period of our activities we found time to accept the resignation of all those faithful class officers who presided over our destinies during our first year, and a new election resulted in the selection of Marsh to fill the presidential chair. Any apprehension felt, due to the solemn warning given by the incumbent of the chair of physiology, was lost sight of in the common struggle with other problems, especially those encountered in the bacteriological and pathological laboratory, where strict observance, delicate technique, and extraordinary carefulness and cleanliness reign supreme.

Following the usual custom, a class pin was finally selected, and during the closing days of winter we paused long enough to assemble, in company with the other classes of the Veterinary Department, about the festive board at Freund's, where we enjoyed a banquet of no mean proportions. The menu was excellent, the arrangements beyond criticism, and the music most inspiring, as was evidenced by the eloquence displayed by many orators, in response to the toastmaster's program and stimuli of varied refreshments.

Vacation came as a blessed boon, and after an interval which seems all too brief, the class roll was again called in preparation for the final lap, when it was whispered about that Dan Cupid and the final exams. of the previous year were responsible for changes in our personnel, it being apparent that Morcock and Hammer were missing, and in their place came Maher with a resolution to go down the home stretch a second time and win by a goodly margin.

Experience had taught us that each year required more study and the senior work is proving the rule, for we found it necessary early in our course to observe the old axiom, "Business before pleasure," and even now, in the closing days of our college career, we observe it still. Yet, it is proper to state that we can recall having spent many hours, full of interest and amusing incidents, under varying surroundings while receiving special instruction at such places as Fort Myer, Va., the Government Experiment Station at Bethesda, Md., the National Soldiers' Home, the Government Hospital for the Insane, and various fairs held in Maryland. Also, let us not forget the Veterinary Medical Association banquet in which we, as Seniors, took a leading part, and our class banquet which is to be held when our final exams. are relegated to the past.

It would not be a fair history to close without paying tribute to the sterling qualities of the class members who have stood together so loyally and who have labored so industriously, many of them under the most adverse conditions. But we will not further review the past, but rather look forward to the day now at hand which bids us go out into the world, no longer as students of Veterinary Medicine, but as Veterinarians, and though we shall always remember the parting words, "Well done, thou good and faithful servant," which a gracious Alma Mater will say to one and all, we realize that in this broad, free country of ours there is, after all, one question which an intelligent public has the right to ask of each graduate, viz: "What can you do?"

Here's to the Class of 1912; may all her members graduate!

Senior Veterinary

✱

A. T. AYERS

Secretary Veterinary Medical Association, 1911-12

Ayers originated his first question in West Virginia some time in the 80's, and has been on the job ever since; but—which hurts the most, to dishorn or to perforate the nasal septum of a vicious bull? In the capacity of book agent he supplies his classmates with all material (except the "midnight oil") necessary in reading up on facts and theories pertaining to veterinary science.

FRANK H. BENJAMIN

Class President, 1911-12

"Ben" grew up on a Maryland farm and will prove that he appreciates the environment of his boyhood days by returning there to practice his profession. Benjamin has specialized in feline surgery, having borrowed at convenient times various felines which are ordinarily in possession of a maiden lady residing near the college.

J. WESLEY BUCHANAN

"Buck" is a native of the District of Columbia and a born lover of animals. He is confident, optimistic, and the best tenor in the college choir. Is a specialist in canine practice and is already on the watch for a good location in which to practice.

HARRY THOMPSON CLAYTON

Treasurer, Class 1911-12

Harry began his first milking experiments in Missouri, where he later became proficient in handling mules while laying out furrows on his father's farm. He is a close observer, a good student, and knows all about mules. Has scratched nearly all his hair from the top of his head while endeavoring to simplify differential diagnosis, but it was worth the price and nobody regrets it but Harry.

WARREN B. EARL

Class Treasurer, 1909-10

Vice President, Class 1910-11

A native of the Empire State, Earl joined us after serving three years with the U. S. Cavalry at Ft. Myer, Va. He is a capable student, his only weakness showing itself when he gets on a skate—or a couple of them; but who would do otherwise than cut an occasional lecture when there is rare sport to be had on the inviting surface of the basin, down by the monument, or on beautiful Rock Creek, due to icy weather and a charming companion.

Senior Veterinary

CHARLES THOMPSON FAKE

One of the few members of our class who has persistently refused to accept a class office. Charles is a hard-working, level-headed young man and an authority on practice—especially on the technique required in "osculation" when your horse has pneumonia and there is no stethoscope available.

GREYDON ST. C. HICKS

Born in the Wolverine State in the latter 80's, Greydon has several long suits, one of which is extracting teeth. With his quiet, unassuming disposition, together with much practical experience to his credit, he is sure of much success in the practice of his profession.

JOSEPH ERNEST HODGE

Treasurer, Veterinary Medical Association, 1910-11

Joe is a native of Tennessee and possesses a sunny disposition as well as a new growth which has lately made its appearance visible on his upper lip; although it is now a poor excuse for a moustache, Joe hopes to devote more time to its care after next June, while waiting in his office for calls. Besides being an active worker in college affairs, he is the recognized leader of the insurgent element and an expert on canine surgery.

CAMPBELL LLOYD HOLT

Class Editor, THE CHERRY TREE, 1909-10 and 1911-12

Class Editor, *The Hatchet*, 1909-10

Holt got his start on the plains of the Lone Star State and has been hitting the trail ever since, having camped in various places, including Hawaii, the Philippines and China, and finally landing in Washington. While in college he has made a specialty of estimating to the minute the age of an animal by examination of the teeth.

HARRY A. LOCHBOEHLER

President Veterinary Medical Association, 1911-12

"Professor" professes to be a native of the District of Columbia, though his legal residence is in Nebraska. Harry has done noble work the past two years while imparting to the Freshmen the store of knowledge he has gained regarding materia medica and chemistry. While organic chemistry is his specialty, he knows something about the inorganic variety—in fact, he says he couldn't do without it.

Senior Veterinary

WILLIAM ALBERT MAHER

William is serious in his efforts and deserves credit for the perseverance he has shown in his work while with us, having joined us in our senior year. He is quiet by nature, but expects to start a commotion when he receives his degree and goes out among the farmers of Virginia, his native State.

HADLEIGH MARSH, B.S., Φ Σ Ε

S. B. 1909, University of Chicago

Sigma Phi Epsilon

Class President, 1910-11

"Happy" is the best product Wisconsin ever sent over the pike. As a president, Marsh proved to be a fine politician, always ready to do anything in his power to further our interests. His cheerful disposition and smiling countenance are well nigh irresistible—if you do not believe it, ask some of the sorority members. Will follow the advice of Horace Greely and go West.

FLOYD I. McCLURE

Floyd is first of all a capable horseman, and, though young in years, is old in experience. Like his brother, Fred, Floyd has inherited certain dominant characteristics which mark him as a loyal friend, a good student, and a winner with the girls. Does not like to take an active part in pathology quiz, but is great on practice and surgery, and especially anaesthesia of swine.

FRED K. McCLURE

Vice President, Class 1911-12

In the famous Keystone State, not many years ago, the sun shone one bright, fair morning on a household all astir, and on that day the population of Pennsylvania was increased by one lusty, beautiful chap, destined later to become the subject of this brief sketch. In addition to being handsome, "Mac" is a musical genius and leads the choir which frequently conducts its performances in the cow stable.

JAMES W. NORRIS

Norris joined us as a Junior, having already completed two years of study in the Medical Department of George Washington University, where he became proficient in the use of the scalpel and helped perform many classical experiments in physiology. Is a handy fellow to have around during quiz, and always delivers the goods. Will enter the B. A. I. service or hang out his shingle in Maryland.

Senior Veterinary

EDWIN R. PERRIN

Perrin possesses a retentive memory which frequently supplies the proper answer when delving into the parlance of anatomical lore. Has spent his annual vacations carrying out practical therapeutics among Michigan farmers, where he expects to locate.

CARLOS SANCHEZ LLOVERAS

Is a typical representative of the Argentine Republic, having been born at Buenos Aires, in the year 1888. There he obtained his early education in the National School of Argentina, and during 1908 and 1909 was a student in the Veterinary Department of the University of Pennsylvania.

JESSE K. SMITH

Class Editor, THE CHERRY TREE, 1910-11

Class Editor, *The Hatchet*, 1910-11 and 1911-12

In the autumn of 1909-10, Jesse showed pathognomic symptoms of restlessness, complicated with thoughts of the big horse college in a far eastern city, which led him to make a last survey of the boundless mesa and cloudless sky of Arizona, desert his faithful pack-train and board the fast, Eastern Express, en route to Washington.

BENTON MEHRLING STAHL

Class Treasurer, 1911-12

The youngest member of his class, and a native of the District of Columbia, "Dutch" expects to reach his majority and receive the degree of D. V. M. at about the same time. He is a quiet, unassuming lad, and with his perseverance and good looks, bids fair to become a successful Vet.

JUNIOR VETERINARY CLASS

Juniors

STARTING as we did, with the unlucky thirteen staring us in the face, and the further handicap of being the smallest class in the history of the Veterinary School, we now number nine. Six men fell by the wayside on the initial lap of our three-year course. It is one grand example of the survival of the fittest.

Far be it from us to sing our own praise, but we admit (proof unnecessary) that everything considered, small though we are, we are not lacking in ability, application to study, and last but not least important, college spirit. As an instance of the last named qualification we voted unanimously for a compulsory tax or fee for athletics, not merely for the sake of athletics, but because we believed and still believe that they are of inestimable benefit to the University.

We are a very cosmopolitan class, seven states and the District of Columbia being represented by our nine members. The best kind of good fellowship prevails amongst us and the many small jealousies that are so noticeable in some classes are conspicuously absent.

All of us are looking forward to next year with great hopes and expectations of graduation. We realize that there is a great future for the well-trained veterinarian, a future that is broadening and increasing in scope all the time. We also realize that a high standard has been set up for us and we are confident that the well-balanced course of study laid out for us by our beloved Alma Mater, will qualify us to cope intelligently with any problems that may confront us.

In conclusion we take this opportunity to express our appreciation of the efforts of the Faculty in our behalf. It is not the fees they receive that draws to the school the fine corps of teachers we can so justly boast of, than which there is none better qualified in the United States, but it is rather the love of the work and their big-hearted desire to share their knowledge with us. We thank them, each and every one, for their efforts in our behalf and again assure them that we will always try to live up to the high ideals they set for us, not only by their teaching but more especially by their example.

THIS is the only honor society in the George Washington University. Its membership is recruited from those members of the senior classes of all the departments of the institution who have proven themselves worthy of the honor of public recognition by constant participation in student activities and who have been especially distinguished in the branches of student effort in which they have engaged.

The purpose of the organization is two-fold. Not only does it seek to honor those whose consistent effort and exceptional services to the University have given them a position of respect among their fellow students, but also its object is to foster college spirit, encourage student activities wherever found, and to aid the welfare of the George Washington University by all the means under its control.

It is believed to be an asset to a University to have such an organization as this cosmopolitan, distinctive society conducted upon the broad lines of general usefulness to the students and to the college. It offers an incentive to participation in college activities and will go far toward maintaining a high standard of effort in sport, debating, class organization, student publications and such other enterprises, generally admitted to be essential to the modern educational institution.

The members of the society in the University, previous to the spring election, follows. Their records which have made them eligible may be found under the various class rolls in these pages.

THE TRACK

TEAM

THE RELAY FOUR

The Track Team

JOHN PATON FLEMING, *Captain*

HOWARD W. HODGKINS, *Manager*

Assistant Managers

GORDON SLARROW

RALPH HOSPITAL

ALVIN M. BROWN

MANAGER H. W. HODGKINS

THE University Track Team had this year one of its most successful seasons. Very little work was done early in the season, and the team first made its appearance in our own Fifth Annual Indoor Games at Convention Hall on the 10th of February.

The games were larger in point of number of events and of contestants than any ever held in this city, and were run off very smoothly. In the collegiate relay races Swarthmore defeated the Carlisle Indians, Virginia outran Washington and Lee, and Maryland Agricultural ran away from the University of Maryland, while our own team lost to Richmond College in one of the fastest races of the evening. The support rendered our men by the small rooting section was something on which the University has to congratulate itself. They had their chance to cheer when Captain Johnny Fleming ran a fine race in the two-mile event and came home well in the lead in very good time.

The next appearance of the team was in Baltimore, at the Johns Hopkins-Fifth Regiment games, the following Saturday. Here our relay team breezed home ahead of that of our old rivals, the University of Western Maryland, by a wide

margin of at least fifty yards. The men who composed the team were Captain Fleming, Keats, Valaer, and Hamlin.

The team went down to Richmond on the 24th, to the Richmond College games, where we entered a relay. We were matched with the South Atlantic Championship team of the University of Virginia and our men ran a very creditable race, losing by but a very few yards.

Our relay team made its last indoor appearance at the meet of the National Guard Athletic Association in Washington, where our team was defeated by a few feet by the University of Maryland. On the team which ran in this race D. C. Smith was substituted for Hamlin. The track was very narrow and the turns short and our men had great trouble making them, having trained on the saucer track at the Y. M. C. A.

The team made its first outdoor appearance at the Southern Inter-collegiates held at Charlottesville under the auspices of the University of Virginia. Here we won second place in the meet, being beaten out for the point trophy only by the University of Virginia, and beating out such schools as Johns Hopkins and Virginia Military Institute.

The men who won our nine points were Diener, who won the pole vaults, Captain Fleming, who got third in the two-mile, and Maxson, who got third in the mile.

Mr. JOHN PATON FLEMING, *Captain*

The men who have come out under the adverse conditions and trained over at the Y. M. C. A. deserve the thanks of the School. Since there was no money to be gotten from the School, they furnished their own uniforms, and in many cases paid their own expenses at the Y. M. C. A. The same lack of funds prevented our securing the services of a trainer, and the men had to work out without professional direction.

The only other outdoor appearance of the team was in the annual five-mile run of the Baltimore Cross Country Club. Captain Fleming and Maxson both ran fine races and secured second and third places, forcing Holden, the Canadian fifteen-mile champion, to set a new record for the course to win.

It is hoped that matters will be in better financial shape next year, and that the team may be better provided for, but there is no doubt that under the circumstances the past season was most successful.

The 'Varsity W has been awarded Captain Fleming, Keats, Valaer, Hamlin, Diener, and Manager Hodgkins. G. W.'s were awarded Maxson, D. C. Smith, and Slarrow, while Hospital and Brown received their numerals.

Societies and

Clubs.

REYNOLDS

THE ENGINEERING SOCIETY

Engineering Society

THE year 1911-'12 has, on the whole, been a successful one for the Engineering Society and, considering the number of conflicting elements which must be made to work together for the common good in any such organization, we have all gotten along remarkably well.

The second annual banquet held at the Ebbitt House in December was a great success and has probably assured a yearly banquet in the future, as regular as exam. week. This banquet is one of the few school affairs where professors and students meet in a social way and see each other as they really are. Then, too, the feed last year was really pretty good, and some hungry members might come for that reason if for no other. The great trouble with the banquet, just like all the meetings of the society, is to get the fellows out, and I want to ask in the strongest terms possible for the hearty support of everyone when the Society holds its first meeting next year.

Another new feature was introduced this year by Mr. Safford, president of the Society, namely, meetings at which some of our fellow students deliver the lectures instead of an imported speaker. These meetings ought to be held often next year, as there is lots of local talent in the school if people only knew it.

One of the most important events of the year was a change in the constitution of the Society, whereby a member of either the Junior or Senior classes is eligible for election as president, instead of only a member of the Senior class as heretofore. This change was considered advisable on account of the difficulty experienced in getting a member of the graduating class who is willing to assume the duties of president along with his other work. On the other hand, many students consider this office an honor which rightfully belongs to the Senior class. Just how the change will work out in practice remains to be seen.

Another important change was a rule whereby all nominations for officers of the Society must be made at the first meeting of the year and the elections held at the next meeting, thus doing away with any possible chance of rushing through with an election.

During the year we have heard some extremely interesting lectures delivered by men prominent in their respective lines and best able to talk on engineering subjects. With our new building, containing a comfortable room for meetings, the ones next year should be better than ever.

I think we all want to thank Mr. Howard P. Safford, president of the Society, for the successful way in which he steered his ship through somewhat tempestuous seas, as well as the other officers and members of the committees.

The officers for the year were as follows:

<i>President</i>	HOWARD P. SAFFORD
<i>Vice-President</i>	JOHN H. HESSON
<i>Secretary (Active)</i>	W. M. LEONARD
<i>Secretary (Retired)</i>	EDWIN A. SCHMITT
<i>Treasurer</i>	ARTHUR H. BRAME

G. H. BASTON

M. A. POZEN

ELMER STEWART

THE second year in the history of the Chemical Society has been one of progress and advancement. A score of new members have been added to its rolls, the same active interest which marked its initial year has been manifested and its meetings and functions have been well attended. On the occasion of the election of officers, held in October, Professor Munroe, the Honorary President, made a few felicitous remarks and the retiring president and Mr. Hamlin described from a chemical standpoint how they spent the summer. At the November meeting, papers of metallurgical interest were presented by Messrs. Pozen and Lodholz. This feast of technics was followed by a most enjoyable "feed" served by the lady friends of the Society. Upon this occasion, let it be remembered, several of the poetically-inclined contributed in a post-prandial manner. On November 28th the largest meeting of the year was held, when a demonstration of the application of incandescent surface combustion was given under the joint auspices of the Society and the Director of the Bureau of Mines. The results of experiments made by Dr. Bone, professor of industrial chemistry at Leeds' University, England, were set forth and illustrated by lantern slides and experiments.

The annual public meeting and reunion was held on February 16th, at which time Dr. F. W. Clarke, chief chemist of the U. S. Geological Survey, delivered a lecture on "The Composition of the Earth's Crust."

During the year symposiums on "Sulphur Mining" and "Water" were held. Mr. Reuter laboratories, and was divided into four experiments—"Digestion," "Inncera-paper on "Soap." Mr. Dyer, of Cleveland, Ohio, gave an illustrated talk on "The National Carbon Company's Products and How They Are Made," and Mr. Baston's talk describing his soil-testing expedition to the Pacific Coast was illustrated with numerous lantern slides and photographs.

The second annual banquet or "food test" was held on February 28, at the Fritz Reuter laboratories, and was well divided into four experiments—"Digestion," "Incineration," "Spontaneous Combustion" and "Unstable Equilibrium." The guests included President Stockton, Dean Munroe and Dean Hodgkins, who, together with Mr. Thatcher, the president of the Society, responded to the toasts which constituted the hird experiment. The exothermic reactions entering into this experiment were induced by Mr. Pozen, the catalytic agent, and the entertainment features provided by the Food Inspection Committee were decidedly unique.

The Chemical Society closes a most successful year and has without doubt fulfilled its object—"to promote interest in chemistry among the students of the University and to encourage better acquaintance and mutual help among the students of Chemistry."

------------------------	------------------------	---------------

THE VETERINARY MEDICAL ASSOCIATION was organized during the session of 1908-09 by the class of the College of Veterinary Medicine. Its membership is composed of the members of the Faculty and the Alumni of the Veterinary College of George Washington University as honorary members, and all the students as active members.

The aim of the Association is to assist its student members in preparing for the broader sphere of life they are about to enter as professional men, and to enable them to intelligently discuss the questions and problems encountered in the various branches of veterinary medicine. In order to accomplish its objects papers pertaining to some phase of the profession are read at each meeting either by students, honorary members, or by some reputable speaker, after which a free discussion follows. In this way much benefit is derived, and many interesting scientific points are brought out in debate.

These meetings, held twice monthly, provide a neutral ground where all class distinctions are set aside, where Freshmen, Juniors, and Seniors mingle, and enjoy equal rights. Here many pleasant and lasting friendships have already sprung up among members of the different classes, thus helping, more than any other one thing, perhaps, to promote a common interest in regard for the welfare of the Department.

Each year a banquet is given, at which time invited guests help to enliven the occasion with informal speeches and contribute much to an enjoyable occasion.

Keeping pace with the steady growth of the Veterinary Department, our Association is increasing in membership, power and usefulness, and bids fair to be a strong college organization. As in the past, so in the future, will it stand for advancement in all things worth while and will be a strong bond uniting its members in a common interest for the welfare of the University.

PERHAPS the only worth-while religious organization in the institution is the Young Women's Christian Association. Throughout the many years of its existence this society has been a constant factor in the moral uplift of the student body. Its membership is recruited from the most progressive and aggressive of the young women of the College of Arts and Sciences and the Teachers College. The organization has been found supporting every movement of the student body with a vim, and in many instances has been the prime agent in promoting student activities. The support given to the daily chapel exercises comes largely from the Y. W. C. A. Among the prominent members are Miss Katherine Summy, Miss Hobbs and Miss Armes. A complete roster follows.

CLASS PRESIDENTS' ASSOCIATION

Class Presidents' Association

THE Class Presidents' Association, as should be the case, has been the means of bringing the student and the faculty of the University in close touch with each other.

Hardly had the election of officers of the various classes been announced when President Stockton, of the University, called a meeting for the purpose of considering school athletics and more especially to consider means to defray the athletic deficit then existing from past administrations. The meeting was an enthusiastic one and means were provided for an aggressive campaign to raise this money. It also provided a time for the election of officers of the association. At the next meeting the association was formally organized and the following officers elected:

L. H. ENGLISH (Junior Medical) *President*
 E. S. WOLFE (Freshman Law) *Vice-President*
 W. F. PASSER (Sophomore Medical) *Secretary*
 WILLIAM J. CANNON (Freshman Engineering) *Treasurer*

The meetings of the association have been frequent, and it has been quick to take up and inaugurate matters which pertain to the good of the University. The campaign inaugurated to wipe out the athletic deficit was prosecuted with vigor by the various class presidents, and over half of the deficit was paid in.

As a means of keeping the faculty advised of the feeling of the student body and acting as a mutual representative for both student body and faculty, the Class Presidents' Association is undoubtedly a desirable organization. It can be truthfully stated that the Class Presidents' organization of 1912 has undoubtedly filled this requirement.

The departments are represented by the following gentlemen:

Arts and Science—CHUBB, TAYLOR and GORE
Engineering—BOUTELL, SLARROW, MURRAY and CANNON
Teachers' College—WUEST
Law—HUDSON, DIEBERT and WOLFE
Medical—LUCKETT, MARTIN, ENGLISH, PASSER and PUTSZI
Dental—MICHAEL, DURFEE and HAGEN
Pharmacy—SWAN, SNYDER and STEPHENS
Veterinary—BENJAMIN, GRENFAL and WHITNEY

THE work of the George Washington Y. M. C. A. has been greatly hampered for the past two years by the lack of a good room. We recall with a sigh the spacious tower room in the old Fifteenth street College Building, in which we used to enjoy many a prank born of undergraduate vim, secure in the knowledge that we were three floors above the Dean's office. Then we had some place to receive the new students, and make them feel at home in their newly-acquired Alma Mater. But when the University sold its home and took to apartment life on I street, a parlor of true apartment-house dimensions was found for us right next to the attic. We did not complain, but set to work to carry out the aims of our organization as best we could under the new conditions, and could boast at the end of the year that we were still "holding our own." This year we traded quarters with the two publications, and as a result found ourselves in a much larger place.

The aims of our organization are fourfold: To provide companionship and friendly Associations for the students of the College, to carry on religious work among the men, to provide opportunities for the men of the College to get acquainted and enjoy themselves socially, and to assist in maintaining high standards of conduct among the students of the institution. These aims find concrete expression in the maintenance of a Y. M. C. A. Room, the Y. M. C. A. chapel services and Bible Class, the University Night, and the annual Y. M. C. A. Banquet, and the membership activities of the Association.

When the announcement was made that the Department of Arts and Sciences would move to the St. Rose School Building, the Y. M. C. A. applied for and obtained from the faculty full charge of the general men students' room. The Association recognized the opportunity both for more practical work among the students of the College, but also for the coming into more intimate touch with the majority of the students. This room the Y. M. C. A. undertakes to make attractive, to supply with several good magazines, and to keep in order.

The religious work of the George Washington Y. M. C. A. centers in the mid-day chapel services and its Bible Class. The Y. M. C. A. alternates with the Y. W. C. A. in conducting the Wednesday chapel services, endeavors to increase the male attendance at all the chapel services, and furnishes itself a good proportion of the masculine part of the audience.

Only one Bible Class has been conducted by the Y. M. C. A. this year. We were fortunate in securing as a leader the Rev. Brascamp, assistant pastor of the Church of the Covenant, who has had experience in conducting classes at Ann Arbor and Princeton, and is recent enough from college to sympathize with the college man's viewpoint. The class has taken a series of studies on the "Social Significance of the Teachings of Jesus Christ," using Robert Jenks' book of that title as a text-book. The class began on January 10, and concluded on April 3, just before the Easter holidays. Its sessions were from 1 to 1:30 p. m. on Wednesdays, and had a regular attendance of about ten. We hope to start our Bible Class earlier next year, and we urge you to come. It is conducted on non-sectarian lines, and you will benefit by the broad discussion.

This year the Y. M. C. A. inaugurated an activity which it hopes to perfect and continue during the coming year. On Friday, January 19, through the kindness of the Central Y. M. C. A., we held a "University Night" at the Central Y. M. C. A. Building, to which the men of the University were generally invited. Representative Mondell, of Wyoming, gave an illustrated lecture on the work at the Panama Canal, which was highly enjoyed by all present. Circumstances prevented us from holding any other such evenings this year, but the feature is one that the George Washington Y. M. C. A. does not intend to abandon.

Our annual banquet was held on March 20 at the Central Y. M. C. A. Building, and was one of the best that we have ever had. The affair was the work of a committee consisting of L. A. Maxson, W. E. Brock, and A. H. Redfield. Through the help of the Central Y. M. C. A. we were able to secure a set of the most eloquent speakers. Dr. Charles E. Barker addressed the banqueters on "True College Spirit," and Secretary Myron J. Jones on "The College Man and the Social Conscience." President Stockton told us what service we could perform in the University. Our chief speaker was Representative Solomon F. Prouty, of Iowa, whose address on "The Future of the College Man" was deeply appreciated. We were satisfied with everything but the number of students present, and we hope that the memory of the good time this year will bring out a rousing crowd next year.

Our membership is composed of students who are interested in maintaining religious activities and Christian standards of conduct among the students of the University, and who are endeavoring to furnish help, companionship, and enjoyment to the individual men students.

We take this opportunity to thank those members of the faculty who have so generously helped us during the past year, and also to express our appreciation for the great help given us by the Central Y. M. C. A. It is to them that we owe the greater measure of the success we have had.

If you are desirous of being of help to your fellow students, of working for college spirit and the common good, if you are anxious to better student standards, if you want to spread good fellowship, if, in a word, you are in sympathy with any of our aims as we have mentioned them, let us know of it and look you up. And if you want to do good work among your fellow students, you have not far to go. It is just one flight down.

Aero Club

THE Aero Club of the George Washington University has now gone through the second year of its existence and may be considered a permanent institution. Organized with the purpose of prompting interest in aeronautics and in diffusing information in regard to the progress and science of aviation, it has given rise to universal interest among the student body, not alone in the Engineering College, but in every department of the University. Perhaps it is the only club unlimited as to the scope of its activities. So great has been the demand for admittance during the past year that membership has been restricted to those alone who have shown some especial merit in the construction of model airships or hydroplanes, or who have gained the recognition of the Aero Club of America or some prominent standard magazine or book devoted to aeronautics. The club has been especially fortunate in obtaining special concessions from the National Aviation School and the Government station at College Park. Those interested in the club or its work may gain full information from any of the following officers:

Committee on Membership—P. J. DONK, R. J. POTBURY, R. H. HARRISON

Delta Sigma Rho

Debating Honor Fraternity

GEORGE WASHINGTON is particularly fortunate in possessing a chapter of the national debating honor fraternity, Delta Sigma Rho. This fraternity bears to debating and oratory somewhat the relation that Phi Beta Kappa bears to academic scholarship. Its membership is composed of those who have distinguished themselves in intercollegiate debating and oratory contests. Membership on an intercollegiate team is an essential prerequisite to admission. The fraternity is found in the larger and more prominent universities where debating is a recognized activity.

The George Washington chapter is due to the efforts of Dr. C. W. A. Veditz, who coached successful debating teams for so many years. The chapter has received a setback from the lapse in intercollegiate debating at the University, and its membership has shrunk from mere lack of eligible candidates. The successful resumption of debating this year, however, has created a number of eligible candidates, most of whom we shall see next year on the rolls of Delta Sigma Rho. With the success of the intercollegiate debating season this year our fears for the continuance of this honor society are ended.

The Enosinian Society

Sergeant-at-Arms.....DONALD L. DUTTON

Executive Committee—H. W. HODGKINS, GORDON SLARROW, ALVIN MC. BROWN

ESTABLISHED in 1822, the Enosinian Society of the George Washington University has endured to the present time, surviving all the trials and vicissitudes—and there have been many of them—through which the University has passed. If we are to judge the future from the past, it may well be said in days to come, “Other societies were and are no more, but the Enosinian flourisheth even unto this day.”

The society has contributed more intercollegiate debaters to the teams representing the University than all the other debating societies combined. Not alone in the field of debating has it been pre-eminently distinguished. It has also led in other branches of student activities. It has constantly stimulated and fostered literary effort and has published in addition to a host of essays on a vast variety of subjects, two literary journals, *The Bee* and *The News*.

Among the names appearing on the roster of the society are those of Lafayette, Webster, Clay, Calhoun, Bryant, J. Q. Adams, Martin Van Buren and Edward Everett. Among the members who have now attained high rank in educational and scientific circles, is that of Dean Hodgkins, of the College of Engineering.

Membership is limited to the Department of Arts and Sciences.

Second Semester.

THE Columbian Debating Society, which was founded in 1889, has for its aim the development of the art of debating and public speaking. The students of the University, in all departments, are eligible for membership. It has the largest membership of any debating society in the University, as well as representatives from more departments than any other society. It meets each Friday evening during the school year in the North Hall of the Law School, at which time some question of moment to the public is debated. At the preceding meeting three members of the society are appointed to uphold the affirmative side of the question selected and three to uphold the negative. At the close of the formal debate each other member of the society present is given three minutes to discuss the question upon either side he may choose. Two honor men are selected at each debate, and when six formal debates have thus been held another formal debate is held between the six first honor men selected, and three of this number are elected by the society to represent it in one of the series of three inter-society debates between the Columbian and Needham Debating Societies held each year. The first two inter-society debates this year were won by the Columbian, and the honor men in each of those debates were members of that society, V. D. Nicholson being awarded first honor and P. E. Feldman second honor, in the first debate, and in the second debate W. E. Calley was awarded first honor and M. L. Rose second honor.

The first meeting of the year was held on the first Friday evening of the present school year. A large number of old members were present, as well as many new members, and unusual interest was displayed at this meeting. This enthusiasm has continued unabated throughout the entire year, and each of its members feel that they have realized great benefit in developing their ability to think quickly and speak fluently while addressing an audience without experiencing the customary pangs of "stage fright." Four of its members—W. E. Feldman, W. E. Calley, M. Cohen and F. R. Jeffrey—were selected by the board of judges to represent the George Washington University in the double debate with Washington and Lee University, by which arrangement one team from each institution will uphold the affirmative side of the question and one team the negative.

THE NEEDHAM DEBATING SOCIETY

The Needham Debating Society

THE Needham Debating Society, as a debating organization, has naturally met with many vicissitudes in its decade of existence, but perhaps never before this year has it lost not only the first two out of the three annual debates with Columbian Society, but also both honors on these two occasions. The reputation of the society, however, will be only slightly dimmed by this change of fortune. The debate at the close of the last school year, too late for notice in the last annual, resulted victoriously for the Needham Society, making the best two out of three for the year, and this making the third consecutive year of supremacy for the Needham Society. The work done in the society this year, and even in defeat in inter-society debates, has been of a high order, and the membership will carry over to next year the nucleus for a successful year in 1913.

Far more important than mere winning of debates, however, is the continued good fellowship, the continued friendly cooperation and example in search of truth, and the continued friendly competition which in times past made the Needham Society an association of young college men, the memories of which our former members tell us they treasure as among the very brightest and best of their college life.

VARSIITY DEBATING TEAMS

The Intercollegiate Debating

DR. C. W. A. VEDITZ

W. R. FITCH, *Needham*

W. E. CALLEY, *Columbia*

THE past year has been a particularly memorable one in the history of George Washington debating, and marks the fair beginnings of a renewed interest in forensic contests. Not only have the debating societies had a successful season, but a broad outlet for their energies has been provided by the revival of intercollegiate debating. The success of the George Washington teams in this field is a sufficient assurance of the permanency of this newly resumed activity.

The intercollegiate series proved more than favorable to George Washington. The Intercollegiate Debating Council arranged a series of two debates with Washington and Lee University, to be held simultaneously in Washington and in Lexington on the same question, the home team in each case upholding the affirmative side. The George Washington debaters proved their ability to argue simultaneously and successfully both sides of a proposition by defeating the Washington and Lee men in both debates.

The aim of the Intercollegiate Debating Council is to establish a more or less permanent triangular debating league with two others of the more prominent South Atlantic universities. To this end overtures were made to several of the neighboring institutions, but the comparatively late start made this year prevented the formation of a triple association. The generosity of Washington and Lee enabled us to have the two debates. The council expects to announce a definite schedule of triangular debates next year.

The impulse which debating at George Washington has experienced this year is only a revival of the popularity which debating had a few years ago, when it ranked high in the activities of the student body. Interest in debating ran highest from 1901 to 1908, and during that time the George Washington teams defeated representatives of Syracuse, Pennsylvania and the University of Virginia. The last named institution was the keenest rival of our University. One of the most memorable debates between the Charlottesville and Washington teams was held in 1902 on the question of an offensive and defensive alliance between the United States and Great Britain. The judges on that occasion were Chief Justice White, of the United States Supreme Court, and Senator Cullom and Senator Hawley. The debate was held in the Columbia Theater, and was attended by many distinguished diplomats and about two thousand friends of the two universities. The debate was won by our team.

An additional incentive to intercollegiate debaters here is the opportunity for membership in Delta Sigma Rho, the honorary national debating fraternity, made up of men who have participated in intercollegiate contests of debate or oratory. The fact that the University has a chapter of this fraternity is a proof of the standards of debate which our teams have to inspire them in their efforts.

Intercollegiate Debates

APRIL 20, 1912.

At Washington

Resolved, That a general graduated income tax should be made a permanent and essential part of our Federal fiscal system, constitutionality not waived.

Affirmative—George Washington

DECISION—NEGATIVE

*

Intersociety Debates

TWO well-contested debates were held in the Intersociety series, both of which were won by the Columbian Society. The honors of the first debate were given to V. D. Nicholson and P. R. Feldman, and of the second debate to W. E. Calley and C. C. Rose, all of Columbian. As the Columbian Society had won two of the three proposed Intersociety debates and four of the honor men, contest was waived, and the other debate and the remaining two honor men were conceded to Needham. The six honor men will contest in the annual prize debate in June.

DECEMBER 16, 1911

Resolved, That the initiative and referendum, in a form resembling that now in operation in Oregon, be generally extended to the several States.

Affirmative—Needham

been laying under very heavy handicaps in not having a couch and suitable training quarters, but the men are naturally speedy and should, in spite of this, put up a creditable race.

The University of Virginia will run against the Washington and Lee University in a mile relay race and will probably have all they can do to win out. Although we have heard very little of Washington and Lee for the past few years, still they formerly sent very good teams to this city and were once rated among the local favorites. Besides

Calendar of Events

1911

MARCH

- First. Y. M. C. A. elects officers. D. C. Smith chosen president.
- Third. Veterinary Medical Association holds annual banquet at Freund's.
- Fourth. Needham defeats Columbian in the second intersociety debate on initiative and referendum question. Decision unanimous. Honors to Fitch and Le Duc.
- Eleventh. Alumni Association holds annual business meeting at New Willard. Aldis B. Browne elected president.
- Twentieth. Board of Lady Managers of University Hospital give benefit performance of "The Dollar Princess" at New National and raise \$1,014 for hospital.
- . Chemical Society takes trip to Heurich's Brewery for scientific(?) purposes.

APRIL

- Sixth. Chemical Society visits Washington Gas Company's plant.
- Eighth. Alumni Association holds annual banquet at Rauscher's.
- Thirteenth. Annual Y. M. C. A. Banquet at Central Y. M. C. A. Building. Luscious spring lamb holds sway.
- Twenty-fourth. Association of Class Presidents organize and recommend a compulsory athletic fee of \$5.
- Twenty-eighth. Girls' Panhellenic gives "Book Party" to College co-eds.
- Twenty-ninth. Needham defeats Columbian on Federal income tax in last of intersociety series. Honors to Bowen and Kelly.
- Twenty-ninth. Aero Club organized, Harold Keats, president.

MAY

- Third. Davis Prize Speaking held in West Hall. Honors adjudged to W. Jefferson Davis, K. Maxcy, and I. P. Taylor.
- Twelve. Chemical Society holds final meeting, assisted by the Mozart Society of New York.
- . Class Presidents recommend compulsory athletic fee to Trustees. Slarrow and Lerch elected to management of CHERRY TREE.
- Thirty-first. Prof. John Dewey, of Columbian University, addresses graduating class of Teachers College on "Humanism," at Central High School.

Calendar of Events

JUNE

Third. Senior class of Arts and Sciences hold banquet in West Hall. Pyramid Society elects J. P. Fleming, H. Keats, and H. S. Hamlin. *Hatchet* Board elects Redfield and Parker.

Fourth. Baccalaureate sermon at All Souls' Unitarian Church, by Rev. U. G. Pierce.

Seventh. University graduation exercises in Belasco Theater. One hundred and ninety degrees conferred.

Fifth. Prize Debate in Law School Auditorium. Honors to Feldman and Bowen.

SEPTEMBER

Second. *Hatchet* Board elects Dutton business manager.

Fifteenth. Veterinary College opens.

Twenty-second. Senior Vet Class holds elections. F. H. Benjamin president.

Twenty-seventh. University opens in all departments. Exercises in Law School First issue of *The University Hatchet*.

Twenty-eighth. Freshman girls entertained by upper classes at luncheon.

Thirtieth. Veterinary Medical Association organizes for year.

OCTOBER

Tenth. Minute and detailed instruction to guide the Freshmen in their conduct is posted by upper class men at various points around the city of Washington.

Eleventh. Informal reception given to Freshmen by Sophomores. Festivities include fancy dress party. Disappointed in theater party, however.

Fourteenth. Address given before Law Students by S. S. Gregory, President of American Bar Association.

Sixteenth. Doctorate disputation.

Eighteenth. Eleven students graduated.

NOVEMBER

Twentieth. Press Club organized; D. L. Dutton, president.

Twenty-fourth. Freshman dance held at Arlington. Ninety-eight couples present, netting a gain of \$40, which is later turned over to the Athletic Debt Fund.

Twenty-seventh. Mass meeting of class officers and students held in West Hall. Athletic debt assumed by students, and preparations made for whirlwind campaign; \$25 collected on the spot. Preliminary organization of class presidents effected.

Twenty-eighth. Chemical Society gives lecture on "Incandescent Surface Combustion," by Mr. Edmunds, a prominent English engineer.

Calendar of Events

DECEMBER

Fourth. Class presidents organize association; Leonard H. English elected president.

Fifteenth. Annual banquet of Engineering Society.

Twenty-sixth. CHERRY TREE ball held at Arlington.

Thirteenth. Class editors organize; Boyd R. Read elected president.

Fifteenth. Interfraternity meeting at $\Delta T \Delta$ House. Petition for athletic fee and plans for interfraternity dance formulated.

Sixteenth. Columbian defeats Needham in the first of the inter-society series. Honors to Nicholson and Feldman.

Eighteenth. Association of Class Presidents meets. Whirlwind campaign extended to January 15. Student Athletic Committee appointed.

1912

JANUARY

Eighth. Sigma Kappa girls give luncheon for the benefit of the Athletic Fund.

Tenth. Trustees shelve petition for compulsory athletic fee on the ground that not enough students have expressed themselves.

Fifteenth. Columbian women give theater benefit at the National, "The Slim Princess," Miss Elsie Janis starring.

Nineteenth. Resignation of Joseph R. Curl, Secretary of the Law Department, announced. William C. Van Vleck, another alumnus, appointed his successor. College Y. M. C. A. holds "University Night" at the Y. M. C. A. Building. Preliminary debating trials for 'Varsity team held.

FEBRUARY

First. Second semester begins. Whirlwind campaign closes, netting about \$373. Notice to vacate I street buildings served on University by Arlington. Lease of former St. Rose Industrial School announced.

Second. Law Class of 1911 holds banquet at Fredonia and starts formation of Law Association.

Fifth. Alumni give annual banquet at Rauscher's and elects officers. President Stockton announces that University income is assured for the next five years. Students gather at Medical Building to practice rooting for Track Meet.

Ninth. Second set of preliminaries for 'Varsity Debating Team on account of change of question.

Tenth. G. W. U. Track Meet held; a success in every way but financially.

Sixteenth. Chemical Society's annual big meeting. Dr. F. W. Clarke addresses chemists on "Composition of Earth's Crust."

Calendar of Events

Seventeenth. Debating finals held.

Twenty-first. Eleven students graduated.

Twenty-eighth. Chemical Society makes annual Food Test at Fritz Reuter's Laboratory. Experiments successfully conducted.

MARCH

Ninth. Columbian defeats Needham in second of inter-society debates. Honors to Calley and Rose.

Nineteenth. Meeting of Class Presidents elect CHERRY TREE Board.

Twentieth. Annual Y. M. C. A. Banquet at Y. M. C. A. Building. Representative gives stirring address. Toothsome turkey fills the place of luscious spring lamb. Junior Law Class gives smoker.

Thirtieth. Dental Students give dance at the Arlington.

APRIL

Fifth. Easter holidays begin. Department of Arts and Sciences starts moving.

Thirteenth. Representatives of twenty-five law classes organize the Columbian-George Washington Law School Association.

Fifteenth. Department of Arts and Sciences opens in its new home on G street.

Sixteenth. Davis Prize Speaking. Medals to Harold Keats, Miss Anna Rose and Herman B. Chubb.

Twentieth. George Washington defeats Washington and Lee in a double debate in Washington and at Lexington on the Federal income tax question.

Twenty-sixth. Upper Class Dance held at the Arlington.

In Office

Lavina J. Kent

*

* * *"Things to brood on with more andency
Than the death-day of empires."*—Endyman.

TO SOME the "Thirteenth Census of the United States" is but a name. But the phrase would be full of life and real meaning; something more than the call of the enumerator who asked bothersome questions, if you could look into the Census Bureau in Washington. Here are gathered hundreds of boys and girls, men and women, from every state in the Union. Here one comes in contact with every type of the American girls—from the North, South, East and West; girls who have never before been away from home, and are taking this chance of seeing their Capital city and a bit of life.

What, if a man brought into vital relationship with these various types and kinds of girls—from the dark-eyed Southern maiden, the jolly Western girl, to the vivacious full-of-life New England daughter, should be bewildered in the midst of dazzling femininity?

Following is a "heart-cry" suggested in the midst of these things:

. * * * * *

Outside it is raining, and the sky is dark. Here in the silence, I am sitting with your picture before me, and a bunch of violets. No, you didn't give me the violets—you didn't have any right. I bought them myself, because I love them. Lilies and carnations are for the dignity and sublimity of death. But roses and violets are full of life and love, and I bury my face in them.

I'll think it all over again, and then I must put it away forever as one of the forbidden things. I can't forget, and so I won't try, but perhaps it won't be so hard to think about bye and bye.

You came into my life that very first day I worked for Uncle Sam. It isn't quite a year, but I have lived years in that time. Do you remember—you looked at me as if reading my features, and the warm blood rushed to my cheeks and temples. And something entered into my life which I didn't understand.

There was always a good-morning smile, and sometime during the day you generally found a chance to talk to me—just commonplace every-day words, but our eyes were always speaking to each other. But sometimes you were very busy and I could only watch you as you passed down the aisles. Something always told me when you were near. I could distinguish your footsteps, and glance up in time to meet your smile. When you talked to me, my eyes seemed to hold you from their intensity of faith, and scarcely allowed you to turn as you went away.

The Office—Continued

There was only a half hour's nooning, but you came to me just a moment before the bell would ring. Sometimes you would sharpen my pencils, laughing at the very femininity of my method. And when I wore that little pink frock, and the pink knot in my hair, I pleased you. And I wished that I might always please you.

One day, you asked me to go canoeing down the river with you. I told you "yes," that I would go, but I wondered at it. But you wouldn't have asked me, if it had not been right. To me you were the ideal of manhood. You were strong and good and splendid, and I gloried in your admiration. I asked my aunt about it, and she said I must not go because you were so much a stranger, and you had never called upon me. It stormed that evening; it rained and thundered, as if the elements protested against our friendship.

And so next day, I told you what my aunt had said. Then you asked me if you might call, and afterwards you went to church with me in the summer evenings. But one day you were ill, and you had to go from the office. You came to my desk and told me, and I said I was sorry. That night when I said my prayer, I remembered you and asked God to make you well. In my imagination you were very ill, and I wished to send you roses, red roses. I wished to smooth your brow, and read to you. But you were soon better, and came to me again. I was happy, so happy to see you. When you were going to leave me that night, you stooped to kiss me. And the knowledge began to come. I drew away from you, before your lips reached mine, and stood looking at you, all the indignation, grief, surprise, of my dawning womanhood in my eyes. I couldn't speak to you, I couldn't move, and you asked me if I was angry. You asked me to shake hands with you, and you left me standing there.

You didn't talk to me for several days and then you came and asked me if I was still angry. You said you thought I was more frightened than angry. I couldn't explain it to you and so I wrote you a little note. I told you I wasn't so angry as I was grieved that you should have so little respect for me as to wish to take that for which you had no right to ask. You came to me, and your voice wasn't quite clear. You told me you had all the respect in the world for me; that there were not many other girls like me. I suppose you kissed the others when you wished.

My aunt didn't know all this. But she could see the light shining in my eyes when you came, and when I spoke of you. And you were almost a stranger (in her eyes)—and she knew more of the world. And she told my father, and they decided that you must not come to see me. And so I told you. I didn't want to hurt you, and so I told you in story form; how I was the only one of three girls left to my father, and he didn't know you, and he must take care of me. My voice almost broke as I was telling you. You told me it wasn't natural for my face to look so sad for it was usually so bright. Yes, it was bright, and girlish, and pure, from its very ignorance of real life.

The Office—Continued

And then you told me. You said the reason you had always liked me was because I reminded you of the little girl at home—the girl you were going to marry. You said that you both had made an agreement to have such friends as you liked. You would be lonely. And she could trust you, and you knew that you could trust her. But were you quite fair, quite sincere? Did you offer your friendship to me on the right basis? Why, oh why, did they say then, that you seemed so desperately in love with me? By your unspoken words you allowed me to believe that which I had no right.

I think the expression on my face scarcely changed. We made two or three remarks about the studies I was pursuing outside of office hours. The bell rang, and you left me. That afternoon, I worked without pausing. I couldn't raise my head. Something seemed to be hurting me so. You belonged to somebody else! I wouldn't look at you as you passed. I would try not to think of you. I hadn't any right. You should not be in my heart; I would thrust you out if you tried to creep in. For you belonged to someone else! My heart was trying to break, but I would be brave. I would think only of the education I was trying to receive, of all I was striving to become. And it would be all right, because you had no right to love me.

I didn't know the strength of love. Oh, if I didn't run away, I couldn't stop loving you. But if I went home, I would give up my chance of fulfilling my ambition, for there seemed no chance to earn a college course back among the pines and bleak snows. And so I remained, trying to forget you all the time you were near me.

But why did you make me love you? You had no right to make me suffer. No, it is true, you never really said words of love to me. But your eyes and manner talked only of that fact. Why, oh why, did you do it? Were you playing with me, because you saw I knew nothing of the world? Was I to be blamed for my ignorance and innocence and utter faith in humanity? So this was what my friend, who loved me so purely, meant when he pushed back my hair from my forehead, and said I didn't understand how to take care of myself.

I would make you love me then! I would make you suffer, too! I had been an utter child, but you had taught me what love was, and I was a woman! Women had made men forget their souls, and I would make you love me as I loved you, and then you would suffer, too! I would wear a pink gown, and I would coil my hair and entangle the roses with it. And my eyes would flash the fire that daunts men, and makes them worship at a woman's shrine. My neck and white arms! What were a woman's dimpled, rounded arms for, if not to entwine them about the neck of the man she loved? I would make you love me, and you would take me in your arms in a masterful way, as if you were conquering. But I would be conquering you. I would make you love me. I would belong to you just for a moment. I would teach you what joy and strength of

The Office—Continued

love are. I would teach you more than you had taught me. And then I would laugh and laugh, and you would suffer, too.

And then, and then—the thought of her came to me. She would suffer, too, because I had taken something out of your life, away from her. She had loved you first, and you belonged to her. It wouldn't make me happy to mar her life by making you unhappy, for of course I never could belong to you. You must always be true to her or else you would be something I cannot believe. Perhaps you didn't mean to make me love you. Perhaps you cared a little, until you realized.

You said you were lonely. Yes, men do get lonely, and girls do, too. You want them to be feminine; you wish them to be pure and true; you wish to protect them from disease, from hardship, from war. But do you protect them from the greatest of all dangers, yourselves? Is it to their shame that they trust you, love you, sacrifice all for you? And are you merely conquering heroes?

I have tried to hate you, and why can't I? Why may I not love someone else? Others have come to me. But I laugh at them, tantalize them, and send them away. But you are my king, and I play with all the rest.

I love the boy at home. He is a comrade. I tell him my troubles and secrets and ambitions. But somehow it is all different with you. Melancholy and regret and fear never come when you are near. I would trust your strength and your masterfulness. I could live through all the ages with you and have no doubts of God or Eternity.

But it is not to be. You have taught me what love is, and I must not have it. Without it, life was young and bouyant; with the knowledge, life must be calm and strong and ever on its guard.

Perhaps you do not know I love you. I wonder whether, if you did, it would help to make you stronger, and would make you brave sometime in hours of weakness.

I have tried to be the child-woman again, but I can't. I put on my garments of a year ago, but I can't feel the same. Something has come to my life which has become part of me. Sometimes I feel so weak and wish you of all the world could help me to be strong. But that would make it worse.

And so I must be strong and brave, with life richer for what it might have been—just your guardian angel. Yes, I'll try to be good and pure enough to ask God to bless you always.

But "I am lonely—years are so long."

WOUNG YMENCE ASTION CHRISOCIATION.

THE University Conservatory has had a most successful career. Meetings have been held and instruction given daily. Special recitals have been arranged for, and in order to meet the demands of the large and enthusiastic throng of appreciative admirers it has been necessary to hold entertainments each day at noon. Under the able leadership of Professor Misth, Mus. Doc., the progress of the pupils has been clearly marked. On many occasions the honored director of the conservatory has regaled the ears of the many listeners with his mellifluous tenor tones which have been found to transcend the efforts of his numerous followers. The range of the director is astounding. Caruso has been known to say that when he attains such perfection of voice placement he will be willing to cease studying and die confident that by that fact he has made the people happy.

Ⓐegnan.

Visitor: "This is a pretty nice building you have here."

Freshman Medic: "Yes. Even the doors have a nobby appearance."

Ⓐegnan.

Professor Hodgkins: "Mr. Barber will now explain the principle of the derrick, since 'raisers' are generally associated with his name."

The Orchestra in Which Discord is Never Known

Daffydils

BY

"DOC" MUNROE.

The lecture was over. Some of the students were already leaving the room, while some still slept. Suddenly the harsh, rasping voice of Bill Cannon rang out in loud tones: "If copper is against our cause, is phosphorus?"

✱

The H_2S tube was giving forth its fragrant odor as O'Rourke put a clothes pin over his nose. Placing the tube in a beaker full of diluted H_2O , he softly chuckled. "If the zinc is dead broke, has the antimony?"

Brockwell was analyzing a box of shoe polish to ascertain what rotted his laces. Creeping up stealthily behind him Seiler hissed into his ear:

"If Dr. Hodgkins is dean of the Engineering College, is the iodine?"

The students were flirting with the coeds as they passed the laboratory. As McAdams winked at one of them, he sickly gurgled:

"If the hydroxide those girls, would the calcium?"

Rickson was taking up his Christmas collection. As Applebaum dropped ten dollars into the box he said:

"If gold is for rich people, is iron ferrous?"

TAKING NOTES

A Patient's Impressions

Dedicated to

THE CLASS OF 1912

by

ONE WHO LOVES THEM ALL

ONCE upon a time," as all good stories go,
There was a very sick young woman,
Who only *Truth* would know;
To her Doctors, Bowen and Briscoe,
(A team that's hard to beat),
Said "The G. W. U. Hospital is
The place for your retreat."
And she for the first time in her life,
Did just as she was told (?),
And here are her "Impressions,"
Which I will now unfold.

She said, with greatest emphasis,
"It's the best Hospital in Town,
And I think dear Mr. Copping
Deserves an *Angel's* Crown!
There's such a cheerful atmosphere
Which has a ring most true,
And always merry jest and talk
To brace you when you're blue;
And the Nurses are the dearest girls
That ever I did meet, so full of fun and
Pretty, industrious, and discreet.
The Class that graduates this June
Is specially bright and clever,
And my friendship for them all,
Nothing ere shall sever

Of these, first comes "Miss Muffit,"
Blue eyes so full of cheer,
She's not like her of "Mother Goose,"
For she knows *no* fear.
No matter *what* sat beside her,
'Twould not frighten "Miss Muffit" away,
Altho this *might* be accomplished
By Doctor J. Wesley Bovee!!!

Next comes "Kitty Carskey," so dignified and neat,
She'll make some poor chap sorry
Because she is so sweet;
She moves about so quietly,
Her looks are most demure;
But "Kitty" knows a thing or two,
Of *that* you may be sure!

And "Tom," who is independent,
And practical to a T.,
Always hums in clear contralto voice,
Tho busy as a Bee.

"Raymond" next is on the list,
Of daintiest form and face;
Also a fine detective when a "Speak Easy"
You would trace.
She manages cranky patients
When their tantrums they begin;
She escorted me to the exit once
In a shower of tears and gin!

"Dorset's" the one I call "Sunshine,"
With her pretty golden hair.
She's not "A Dollar a Bottle Blond,"
But the *real* kind, sweet and fair.
To look at her who's now in line,
Whom all call "Dearest Siskie,"
Is really as invigorating
As a swig of good old whiskey!
She radiates health and happiness,
Good humor, where ere she goes,
And makes the sickest patient
Forget all earthly woes.

Who's next? It's little "Chinnie,"
With innocent eyes and face,
The expression of an Angel
That helps us all to grace——
She works so hard to keep things clean;
But one day she had to hasten;
A wicked old patient, while walking the halls,
Spit tobacco juice in her Basin.

And "Jolly" is really most aptly named;
For laughter she *always* gives cause.
She's attractive and neat,
Has such cute little feet,

But always such cold "Frosty Paws!"
"Little Jane" is the Baby of this crowd,
A being all dimples and smiles;
I'll bet that when training is over,
To see her, "The Boys" will go miles!

And of "Andy" here it is said by all
That *Men* she sure *does* hate;
But *she* is too kind and loving for that,
And *I'm* from the "Show Me" State!

"Lady Spencer" now comes to the front,
Little woman brave and true,
This world would be a better place
Had it more such types as you.

For a change we'll meet "The Rag-time Queen,"
"Ginger," Gal o' No'th Caliner!
Her like may ne'er again be seen,
Rippin' figger; ain't none finer!
Shinin' eyes and teeth so white,
Yo' am sho'ly out ob sight!
Smilin' morning, noon and night,
"Ginger," Gal o' No'th Caliner!

Then comes "Sundin," so earnest and good,
By many in suffering, so gently she stood!
Like the Goddess of Liberty, stately and tall,
She towers above us and never will fall!

"Last, but not least," is "Smithers,"
The faithfulest friend on earth;
The girls all love her, and so do the boys;
Of the *latter* there's never a dirth.
"Smithers'" long suit is "specialing,"
And the M. D.'s her worth well know,
Especially Hasbrouck and Bowen,
And Dr. John Parran Briscoe!

And now my story's ended;
You know about them all.
God bless them, each and everyone,
Where'er their lot may fall!

Here's to you, Class of 1912,
Each one your best must do,
To add the brightest record yet
To the lists of the G. W. U.!

Your devoted friend,
"THE LIMIT."

Freshman: "Let's go in and see this picture—'The Missing Heir.'"

Sophomore (taking Prof. Hodgkins' course in Physics): "Come on! I've seen enough vacuums."

We've had Evidence from Peter,
Surely nothing could be neater—
And Clephane has taught us what to say;
Real Property is ours,
So that wealth will come in showers,
We're in E(a)rnest—not in play.
We'll promote a corporation,
And we'll surely make it pay some—
You remember Jones suggested this would pay—
We'll go after big game early,
Extract fees from clients surely,
With injunctions make our way.

Oh, the law shall feel our power,
And our widows shall have dower—
Huge estates when we have passed away—
So with this and alimony
They ought to be quite tony;
So let's be joyful while we may.

✱

A Tip to the Faculty—From Law 1913

✱

(Tune—"The Old Gray Bonnet.")

Now this trip is on the quiet
Even money could not buy it—
But we think it our duty now to state
That the faculty may know it,
Even though we're slow to show it,
That this class is something great.

The bar awaits our coming,
And we'll surely set things humming,
And the law we'll settle in our day,
So we'll surely live in clover
When our law-school days are over,
And the big fees come our way.

Kinetic Energy

First Girl: "Don't you think Professor Hough is just dear? Don't you think he's the dandiest Professor?"

Second Girl: "Yes, I do. He is perfectly dandy. Just reminds me of a real swell dry goods clerk."

The Eleventh Commandment

Don't depend on the other fellow; he may be depending on you.

Professor Hodgkins: "Does a pint of water and a pint of alcohol make a quart?"

Student in Rear: "No! It makes a drunk."

Two girls belonging to a sorority were heard to carry on the following conversation:

Miss D. (*a prospective bride*)—When I am married I am going to live in Florida, where they have such fine tangerines, for I just love tangerines.

Miss R.—So do I. But I am going to live in California with all the folks, where we also have tangerines.

Miss D.—California tangerines are not as good as Florida tangerines.

Miss R.—Maybe they are not, but we raise *some lemons*.

Miss D.—So I see.

She: "Don't you think this is an awfully nice handkerchief? I paid three dollars for it.

He: "Whew! What an awful lot to blow in."

Puzzle: Who's dancing with his girl.

Book Reviews

The Gentle Art of Bluffing—By Dorothy Smallwood. Houghton, Mifflin & Co.

Miss Smallwood handles her subject daintily and convincingly. No student should be without it.

What I Think—By Dr. Kern. 15 Vols. Allyn & Bacon. \$1.00 per Vol.

This book will revolutionize society. It consists of excerpts from Dr. Kern's Lectures. The mere announcement of its authorship is enough to secure an unprecedented sale.

Some Men I Have Known—By Helen Hammerly. Doubleday, Page & Co. \$1.50 per Vol.

First two volumes now on sale; the other ten in process of preparation. An ingenious work of compilation. Statistics unusually interesting. Further notice in near future.

College Honors—By Anna Rose. MacMillan Co. 25 cents; cheaper in dozen lots.

This immaculate work will meet with approval among young students. It tells you how to get in, how to stay in, and also how to get all there is in it. The arguments advanced are substantiated by examples and incidents from the author's own college career.

Recent Book Reviews

Diplomacy—By Johnie Lerch. N. Y. Doubleday, Page & Co. \$1.50.

This is really a masterpiece of its kind, telling as it does how to get "in" on everything. It is invaluable to young men with social aspirations. Mr. Lerch takes great pride in the fact that he has not missed a sorority dance this year, and that one sorority becomes peeved if he is too attentive to another. Read it.

Books Received

Harmony Self-Taught. By Charles S. Smith.

Evidences of Christianity. By O. Grantner.

Apologetics. By A. T. W. Schmidt.

Cornell's Le Kid; My Edition. By G. N. Henning.

Man Proposes. By Edward J. West.

The Tailor and the Man. By O. Campbell.

Prery and I. By J. J. Lerch.

Conventional Superstitions. By R. R. Kern.

Cherry Tree Overture

It is the custom for every annual to contain a sort of prospectus of itself. This handsome edition will be no exception to the rule. THE CHERRY TREE represents the George Washington University and a vast amount of paper and ink; also \$2.00—hence the manager. Representative students get out THE CHERRY TREE, and they get out of it all they can. Other people get in it all they can. Opening to the first page you will find a list of the board of editors. Already you feel how funny the book is going to be. For fear they may be forgotten, the faculty are put in next, with every known means of identification. Following the rogue's gallery come pictures of those of the Senior Class, who are not ashamed. Then come the pictures, which, we regret to say, are representative members of the lower classes.

The worst is now over. The rest of the book is filled with the dancing club (Frats.), the athletics(?), and the literary section.

In conclusion, THE CHERRY TREE is bound in exquisite taste, printed throughout by machinery, and profusely illustrated with actual photographs of Mr. John George Finch, and others. You are earnestly urged not to buy, as you can probably pick up a second-hand copy next year at half price.

G. W. U.'S FAMOUS KNOCKER.

Professor: "I wouldn't fight, boys."

Soph: "He called me a thief."

Fresh: "And he called me a blankety blank cheese and smashed this \$17 derby."

Professor: "Well, I wouldn't fight over a difference of opinion. You may both be right."

"What's the chief objection to Professor Hough?"

"Professor Hough, himself."

The Upper Class Dance was in full blast. Many guests had been introduced. Finally one was introduced to a stranger, who extended his hand for greeting.

"McNemar is my name, sir."

"Ah, yes, the son of the Professor of the University," returned the stranger indulgently.

"You say that Admiral Stockton reminds you of a piano? How's that?"

"Because he's so grand and upright."

To Dr. Kern

There was a young professor sentimental,

Who thought the girls detrimental.

But now the tale goes

He's found a wild rose.

She's affecting his attitude mental.
